

Aquatic Lands Enhancement Account

2015-2017 Proposed Projects

Recreation and Conservation Funding Board

The Recreation and Conservation Funding Board provides leadership and funding to help our partners protect and enhance Washington's natural and recreational resources for current and future generations.

Our Values

Efficient, fair, and open programs conducted with integrity. The results foster healthy lifestyles and communities, stewardship, and economic prosperity in Washington.

Goals

- We help our partners protect, restore, and develop habitat and recreation opportunities that benefit people, fish and wildlife, and ecosystems.
- We achieve a high level of accountability in managing the resources and responsibilities entrusted to us.
- We deliver successful projects by using broad public participation and feedback, monitoring, assessment, and adaptive management.

Introduction

The 2015-2017 Grant Competition

The Aquatic Lands Enhancement Account (ALEA) is a state grant program that directs revenue from the use of state-owned aquatic lands to protect, restore, and provide access to those very lands.

The grant program is administered by the Recreation and Conservation Funding Board. In preparation for the 2015-2017 budget, the board solicited applications and received 28 proposals requesting more than \$11 million in funding. The applicants pledged more than \$18 million in matching resources.

A citizen panel with expertise in recreation and conservation evaluated the applications and submitted a ranked list to the Recreation and Conservation Funding Board for consideration. The board reviewed the ranked list and in fall 2014 submitted it to Governor Jay Inslee for funding consideration. Following is the ranked list and descriptions of the projects submitted to the Governor.

Background

Washington's aquatic lands are rich in natural resources and also have great commercial, recreational, and aesthetic value. Simply described, aquatic lands lie at the bottom of navigable water bodies, such as Puget Sound and many of Washington's major rivers, and include the surrounding shore lands, harbor areas, and tidelands.

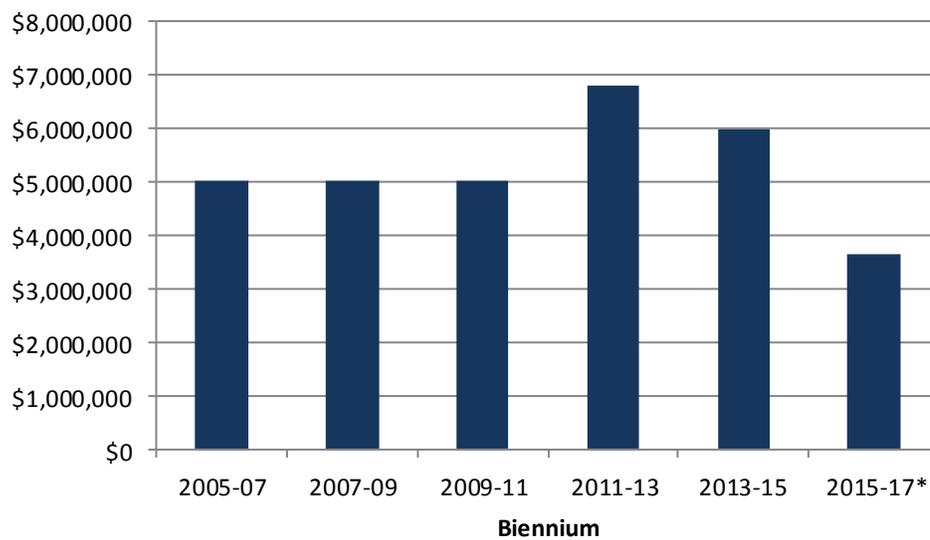

ALEA was created in 1984 to ensure that money generated from aquatic lands was used to protect and enhance those lands. Funding for the account comes from revenues generated by the Washington Department of Natural Resources' management of the state's 2.6 million acres of aquatic lands through activities such as leasing waterfront sites and selling harvest rights for geoduck clams. Some of this revenue is designated for ALEA grants¹, which may be used for the acquisition, restoration, or improvement of aquatic lands for public purposes, and to provide and improve public access to those lands and associated waters.

¹ In some years, the budget has replaced ALEA funds with bond funds to pay for the grant program.

A range of organizations may apply for the grants: Local governments, tribes, and state agencies. Applicants must provide at least 50 percent in matching resources.

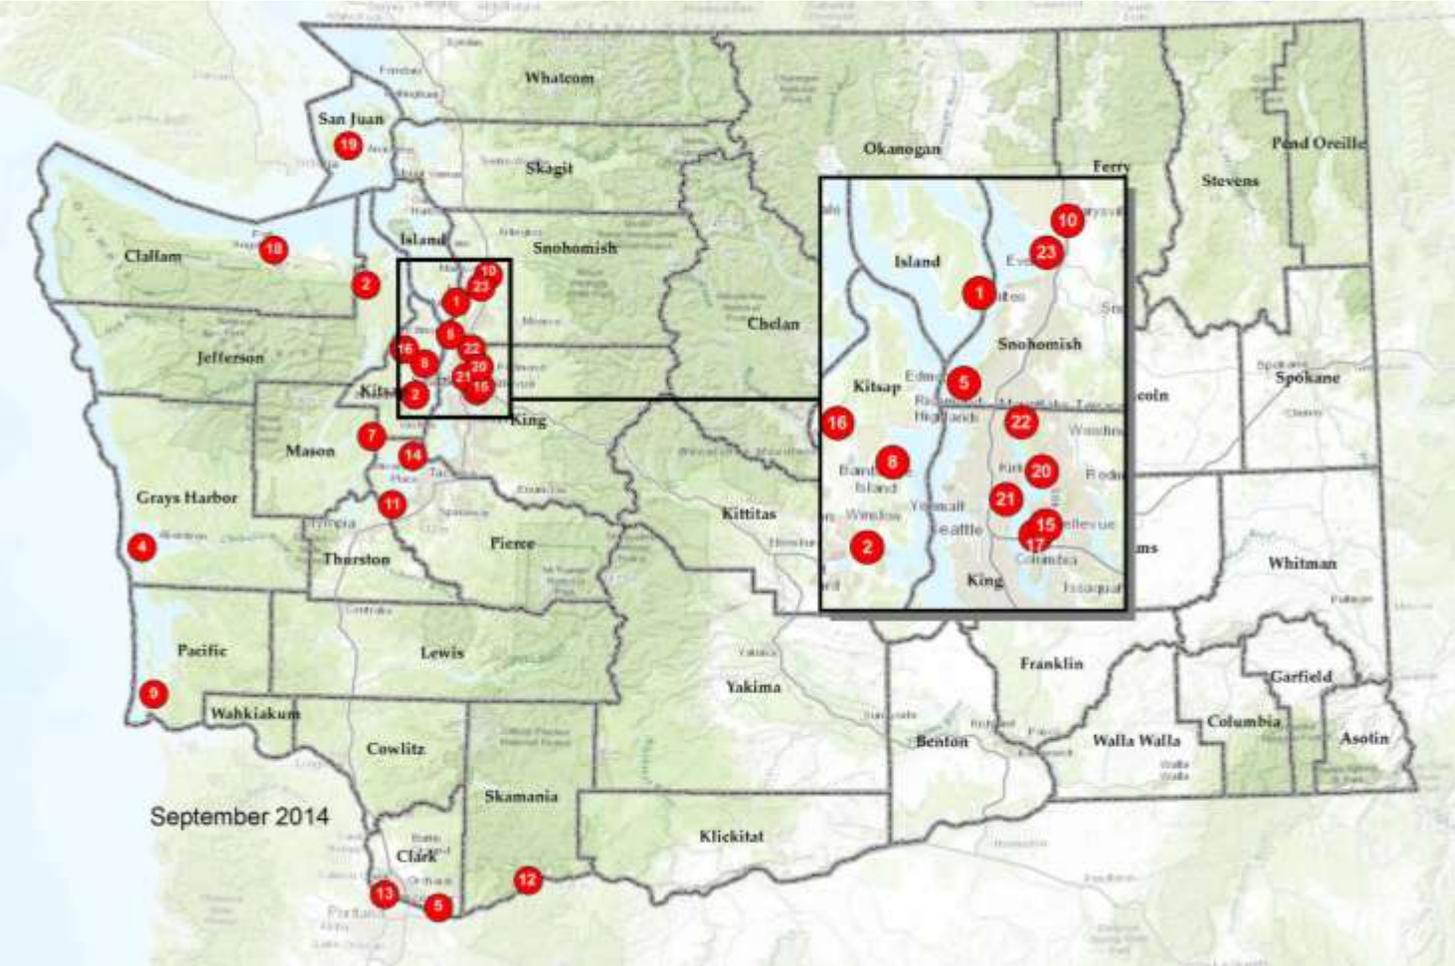

The Recreation and Conservation Funding Board has received \$31.5 million since beginning management of the program in 2003. On average, the Recreation and Conservation Funding Board receives \$5.2 million a biennium for ALEA.

ALEA Funding History 2005-2017

*Governor Jay Inslee's proposed budget. Funding would come from bonds rather than the ALEA account.

Project Descriptions

Island County Glendale Shoreline Access and Restoration

Grant Request: \$587,500

Island County will use this grant to restore and provide permanent public access to 420 feet of shoreline on a privately-owned stretch of Possession Sound, on southeast Whidbey Island. In an innovative partnership, Island County will buy, from the Whidbey Camano Land Trust, a land preservation agreement² that prevents the land from being developed for anything other than public use or restoration, and permanently provides public access to 6 acres that includes a beach, tidelands, forest, and an area for parking. The land trust will own and manage the property for the permanent benefit of the public in coordination with the County. The property was for sale and, to prevent its loss, the land trust secured contracts to buy the land. Public uses will include fishing, birding, non-motorized boating, nature-viewing, picnicking, and beachcombing. The county's parks plan identifies securing public beach access to this underserved area of Whidbey Island as its highest priority. The County and land trust will complete habitat restoration activities including removing a creosote wooden pier, bulkheads, and a boat launch, which will restore the natural coastal processes and improve salmon passage to Glendale Creek. The County and land trust also will remove two old buildings and replace them with a parking area paid for by the land trust. Island County will contribute \$715,000 from a state appropriation, donated property interest, and a grant from the Washington Wildlife and Recreation Program. ([14-1531](#))

² A land preservation agreement, also called a conservation easement, is a voluntary agreement between a landowner and private land conservation organization or a government agency. The landowner maintains ownership of the land, continues to manage it, and receives compensation, such as cash, reduced taxes, or other incentives, in exchange for limiting development on the land.

**Port of Waterman
Waterman Fishing Pier and Seawall Renovation**

Grant Request: \$500,000

The Port of Waterman will use this grant to replace a bulkhead, parking, signs, and a 90-year-old pier over Puget Sound in Kitsap County. The bulkhead is failing and dilapidated structures threaten its ability to protect the shoreline and provide safe access. Waterman is one of only two public access piers in the area that don't also serve boats. The pier is used for fishing, viewing the scenery, crabbing, scuba diving, beach access, and special events. The Port of Waterman will contribute \$828,000 in cash and a grant from the Washington Wildlife and Recreation Program. ([14-1521](#))

**Jefferson County
Discovery Bay Restoration and Trail Construction**

Grant Request: \$500,000

Jefferson County will use this grant to restore about 28 acres of estuary and shoreline habitat that have been damaged by development. The area provides critical habitat for Hood Canal summer chum salmon, Puget Sound Chinook, and steelhead, all of which are listed as threatened with extinction under the federal Endangered Species Act. Coho salmon and cutthroat trout, which are a federal Species of Concern, and numerous other animals such as Olympia oysters, forage fish, and migratory shorebirds also use the area. In addition to the restoration, the County will build two segments of the 126-mile Olympic Discovery Trail, which was identified in the Department of Interior's America's Great Outdoors Initiative. To the north, the County will build 425 feet of trail along slopes next to U.S. Highway 101. This segment includes a 125-foot-long pile wall connecting the trail to Old Gardiner Road. To the south, the County will build 800 feet of trail on a former railroad grade. If the trail does not get built, the Olympic Discovery Trail may be disconnected at south Discovery Bay. Jefferson County will contribute \$500,000 in cash, a federal grant, and cash donations. ([14-1395](#))

**Washington Department of Natural Resources
Damon Point Restoration and Signs**

Grant Request: \$72,500

The Department of Natural Resources will use this grant to control invasive species on 50 acres of Damon Point and replant if needed. Damon Point, which is directly south of Ocean Shores in

Grays Harbor County, is used by streaked horned lark, which recently were listed as threatened with extinction under the federal Endangered Species Act. The department also will place a kiosk and signs at the entrance, providing interpretation and restrictions to protect rare species. New fencing will guide visitors to entry points, and signs will direct visitors away from nesting areas. Damon Point is important to the local and regional community as a walking beach with no vehicles and for conservation of species. The land is ecologically important for migratory animals, and has extraordinary natural beauty. The Department of Natural Resources will contribute \$98,500 from a state appropriation, a federal grant, a state grant, agency equipment, and donations of labor. ([14-1030](#))

**Washington Department of Fish and Wildlife
Edmonds Pier Renovation**

Grant Request: \$500,000

The Department of Fish and Wildlife will use this grant to rebuild the connections and supports between the piles and the deck of Edmonds pier, extending its life for more than 20 years. The pier is in the heart of Puget Sound, 17 miles north of Seattle, and integral to the Edmonds waterfront. With about 100,000 visitors a year, the pier provides a destination opportunity to a diverse array of visitors. It is used for fishing year-round, crabbing, and shrimping. The Department of Fish and Wildlife will contribute \$1 million from a state appropriation, a grant from the Washington Wildlife and Recreation Program, and taxes from a Local Improvement District. ([14-1103](#))

**Port of Camas-Washougal
Washougal Waterfront Aquatic Access Area**

Grant Request: \$500,000

The Port of Camas-Washougal will use this grant to develop 2.4 acres of the last piece of publicly-owned Washougal waterfront along the Columbia River. The land, located on the south side of the Lewis and Clark Highway 14 and the Second Street intersection, will be developed with a trail to the Columbia River shoreline for people and non-motorized boats, a parking lot

with a staging area for kayakers and canoeists, a grass picnic area, an outdoor classroom picnic shelter, a viewing plaza, energy-efficient restrooms, interpretive kiosks, and signs. It is a core community value to preserve the waterfront area in Washougal for the public and to meet an underserved waterfront access need. The Port of Camas-Washougal will contribute more than \$1 million in cash, donations of labor, and a grant from the Washington Wildlife and Recreation Program. ([14-1278](#))

**Mason County
Coulter Creek Acquisition Phase 2**

Grant Request: \$1,000,000

Mason County will use this grant to buy 58.25 acres at the head of North Bay in Mason County between Allyn and Victor. Mason County, Capitol Land Trust, and partners are joining forces to purchase this property. The acquisition will include about 54 acres of forest, 3.25 acres of wetlands, nearly three-quarter mile of unnamed freshwater tributaries, and more than a quarter-mile of North Bay shoreline. The purchase of this property would conserve the property's extensive aquatic lands for

public purposes and give the public access to the water. The County plans to keep the majority of the land undisturbed, but would allow passive recreation, walking on boardwalks or forested trails, environmental education, historical interpretation, and community shellfish harvesting. More than a half-mile of the planned North Bay Trail will pass through the property. Partners include Capitol Land Trust, Squaxin Island Tribe, and Taylor Shellfish. Mason County will contribute \$1 million in a grant from the Washington Wildlife and Recreation Program. ([14-1789](#))

**Bainbridge Island Metropolitan Park and Recreation District
Hidden Cove Park Phase 1**

Grant Request: \$299,000

The Bainbridge Island park district will use this grant to replace a dilapidated float and dock and restore the tideland and shoreline at Hidden Cove Park in Kitsap County. The park district will provide a new pier, gangway, and float, which will protect the tidelands, improve shoreline functions, and enhance public access to the shoreline. The renovation will add accessibility for people with disabilities and keep the opportunity for hand-launching boats.

Interpretive signs will be added that describe shoreline functions that are important for Puget Sound Chinook salmon, which are listed as threatened with extinction under the federal Endangered Species Act. The County also will remove invasive species along the shoreline and

replant as well as remove creosote pilings. Residents have ranked preserving and protecting access to public beaches and shorelines as top priorities in Bainbridge Island’s park planning and survey efforts. Hidden Cove Park is important because it gives people access to the popular, yet largely private, Port Madison Bay. The Bainbridge Island Metropolitan Park and Recreation District will contribute \$299,000. ([14-1358](#))

Pacific County
South Willapa Bay Access

Grant Request: \$30,998

Pacific County will use this grant to build a trailhead that will provide the first public access to south Willapa Bay. The property is in Long Beach, east of Sandridge Road, at the end of 95th Street. The project will provide an access point for viewing nature, car-top boating, environmental education, hiking, birding, and photography of this estuary habitat. The present location has no parking, no safe turn-around space, and no defined waterway access. The new trailhead will have 15 parking spaces. The County also will add signs and an informational kiosk. There is no comparable public access to south Willapa Bay on the Long Beach Peninsula. Pacific County will contribute \$30,998 in donations of cash and labor. ([14-1086](#))

Marysville
Qwuloolt Estuary Trail Development

Grant Request: \$342,369

The City of Marysville will use this grant to provide new access to a highly anticipated, 340-acre restoration project on the shoreline of Ebey Slough. The City will improve the dike trail and build a 1.8-mile trail that connects to city-owned trails and trailheads. The main trailhead is at the city's Ebey Waterfront Park, which provides parking and a restroom. The City will pave the trail, build two viewpoints overlooking the restored estuary, and install site furnishings, fencing, and interpretive signs that will highlight the restored estuarine habitats and the efforts of the Tulalip Tribes and partners. The trail will provide year-round access to the city’s shoreline, which currently is not available. Marysville will contribute \$342,370. ([14-1492](#))

**Anderson Island Park and Recreation District
Jacobs Point Phase 2**

Grant Request: \$82,556

The Anderson Island Park and Recreation District will use this grant to buy and permanently conserve 17.61 acres at Jacobs Point on Anderson Island in south Puget Sound. The land includes most of a small peninsula on the south end of Anderson Island that separates Oro Bay from East Oro Bay, and includes about one-third mile of pristine Puget Sound shoreline, 4 acres of tidelands, and 13 acres of second-growth forest. Purchase of the land will complete Jacobs Point Park and give the public access to an additional 1.2 miles of trails. The purchase also will protect critical salmon habitat and dozens of species of native plants and birds. Oro Bay is one of the closest pocket estuaries to the Nisqually River and provides significant rearing potential for juvenile Puget Sound Chinook salmon, which are listed as threatened with extinction under the federal Endangered Species Act. Oro Bay and East Oro Bay also are part of the Nisqually Reach Aquatic Reserve marine protected area. The Anderson Island Park and Recreation District will contribute \$82,556 from a private grant, a grant from the Washington Wildlife and Recreation Program, and donations of labor. ([14-1240](#))

**Port of Skamania
Stevenson Shoreline Restoration and Recreation Enhancement**

Grant Request: \$344,000

The Port of Skamania will use this grant to build a small waterfront connecting trail and restore the beach on the Columbia River in downtown Stevenson. The Port will restore and conserve 600 feet of shoreline on the Columbia River, which will give the public year-round access to the beach for fishing, swimming, kayaking, kite boarding, windsurfing, walking, bird watching, picnicking, and sightseeing. In addition, the Port will build 475 feet of an accessible waterfront trail that will connect the Lewis and Clark National Historic Trail, the National Park Service’s Ice Age Floods National Geologic Trail, the Columbia Gorge Interpretive Center, Skamania Lodge, the Forest Service Center in the Columbia River Gorge National Scenic Area, and Stevenson Landing Pier. The beach restoration work will include sloping the riverbank and placing root wads there, increasing the shoreline area by 53 percent. The restored shoreline will help endangered Snake River sockeye salmon and salmon species listed as threatened with extinction under the federal Endangered Species Act such as Snake River spring, summer, and fall Chinook and steelhead; upper and lower Columbia River Chinook; lower Columbia River

coho; and middle Columbia River steelhead. The Port of Skamania will contribute \$344,000 from a local grant, cash, and donations of materials. ([14-1125](#))

**Vancouver
Columbia River Waterfront Park**

Grant Request: \$500,000

The City of Vancouver will use this grant to develop the second phase of a 7.3-acre waterfront park on the Columbia River in downtown Vancouver, west of the Interstate 5 bridge. The City will construct viewpoints and overlooks, pathways, and picnic sites; build a fishing pier; and install a lawn, benches, and interpretive signs that highlight the river’s cultural significance and aquatic resources. The project will provide new opportunities for public access to the water and a half-mile of shoreline on the region’s largest river. It will achieve the city’s vision to reconnect downtown Vancouver to the Columbia River, creating new public access that has been blocked for more than 100 years. The larger project will transform a former industrial site into the city’s signature waterfront park. Vancouver will contribute \$1.3 million in cash and a grant from the state Washington Wildlife and Recreation Program. ([14-1470](#))

**Gig Harbor
Ancich Waterfront Park**

Grant Request: \$500,000

The City of Gig Harbor will use this grant to design and develop a waterfront park. Located midway between Gig Harbor’s downtown waterfront centers, the land will include a grassy open area for passive recreation, a ramp and steps to access the shoreline, kayak and canoe storage, and public art. The City will build a shoreline boardwalk, restrooms, and a street-level overlook with seating and spectacular views of the harbor. The City also will install a water fountain, benches, picnic tables, and lighting. The City of Gig Harbor will contribute \$1.1 million in cash and a grant from the Washington Wildlife and Recreation Program. ([14-1457](#))

**Bellevue
Meydenbauer Park Development and Restoration**

Grant Request: \$500,000

The City of Bellevue will use this grant to redevelop and expand a park on Lake Washington’s Meydenbauer Bay in Bellevue, and restore the shoreline for wildlife. The City will move and expand the swim beach, add a curved pier to protect the swimming area and provide moorage for non-motorized boats, build a shoreline promenade, create areas for launching and mooring canoes and kayaks, and create an area for picnicking and playing. The City will remove 660 feet

of armoring and restore the shoreline to a more natural condition. The City also will remove the piping that holds 500 feet of a stream and develop an estuary-like shallow pool at the outflow to cleanse storm water and improve fish habitat. The City will remove invasive plants and replant the area. This part of the bay is used by coho salmon, coastal cutthroat trout, Pacific lamprey, bald eagles, pileated woodpeckers, great blue herons, osprey, and red-tailed hawks. The City of Bellevue will contribute \$3.5 million in cash and a grant from the Washington Wildlife and Recreation Program. [\(14-1582\)](#)

Grant Request: \$426,750

**Poulsbo
Poulsbo's Fish Park Phase 3**

The City of Poulsbo will use this grant to buy 10.05 acres and develop an additional 18.55 acres at Poulsbo's Fish Park. The City will build trails, viewpoints, and parking lots, as well as landscape the area and install interpretive signs. The park is a 30-acre urban nature park on the Liberty Bay estuary, which connects Liberty Bay, Puget Sound, and Dogfish Creek. It has a network of pedestrian trails, viewpoints, educational interpretive signs, and benches. Fish Park is used for passive recreation including wildlife and nature viewing.

The park has shorelines, wetlands, and second-growth forests. This park is a natural wildlife corridor in an urban setting, and supports a diverse population of fish, birds, and mammals. Dogfish Creek and the estuary between the saltwater and freshwater habitats is a beautiful focal point and highlights the unique setting for the park. The Poulsbo community has been very supportive of this project by contributing tremendous sweat equity and funding from service clubs, churches, businesses, the Suquamish Tribe, and individuals. There are nearly 10,000 hours of documented volunteer work in addition to material and property donations. The City of Poulsbo will contribute \$486,500 in cash and donations of labor and land. [\(14-1455\)](#)

Grant Request: \$161,000

**Mercer Island
Calkin's Point Restoration and Access Improvements**

The City of Mercer Island will use this grant to improve Calkins Point at the north end of Luther Burbank Park on Mercer Island. To create a shoreline that is beneficial to wildlife, the City will pull back the point into a pocket beach and re-graded the land to gently slope to the water's edge. The City will lay gravel on the beach, creating spawning habitat for fish, and place large

logs and tree root wads along the beach as well as rocks just above the ordinary high water line to protect the shoreline from erosion by waves. A buried vinyl sheetpile wall will be installed at the upland edge of the beach to retain new park areas. Finally, the City will create a pathway, two picnic areas, and a seating wall. The shorelines next to the recessed beach will be planted with willow trees and the upland area will be planted with native species plants. The work is expected to stabilize the shoreline, improve lake water quality, remove invasive species, enhance habitat for juvenile sockeye and Chinook salmon, create habitat for wildlife, and provide a water access point for park visitors. The preservation and restoration of Calkins Point was identified by the public as a top priority during the development of the Luther Burbank Park Master Plan. The City of Mercer Island will contribute \$171,607 in cash and staff labor. ([14-1227](#))

Port Angeles

Grant Request: \$500,000

Port Angeles Waterfront Park and Trail

The City of Port Angeles will use this grant to redevelop 3.25 acres along the downtown waterfront. The area will include a wide esplanade, which will accommodate one-third mile of the regional Olympic Discovery Trail and provide access to the Peabody Creek estuary. The City will plant native plants and soften the armored shoreline with an amphitheater. The project area is bookended by two other parks, and once completed, will provide 8 acres of contiguous park space. The Olympic Discovery Trail runs 130 miles from Port Townsend west to the Pacific Ocean. Improving the connection to this trail in downtown Port Angeles is critical for the thousands that use this regional trail. The City of Port Angeles will contribute \$1.7 million from its Economic Development Fund and a grant from the Washington Wildlife and Recreation Program. ([14-1190](#))

Port of Friday Harbor

Grant Request: \$441,900

Friday Harbor Waterfront Esplanade

The Port of Friday Harbor will use this grant to build a waterfront pathway connecting a marina, waterfront park, ferry terminal, and downtown. The Port will build the esplanade, install educational features that tell the story of the local marine ecology, build a stairway to the beach, plant native plants along the shoreline, and install seating areas. In addition, the Port will install planting strips, rain gardens, and other features to improve storm water quality and offer opportunities to learn about treating storm water. Every year, thousands of people visit Friday Harbor's downtown waterfront, which receives the most visitors in the San

Juan Islands, but there is no link along the water's edge for pedestrians to move freely between important waterfront locations. The Port of Friday Harbor will contribute \$441,901 in cash and a local grant. [\(14-1647\)](#)

Kirkland
Waverly Beach Park Renovation

Grant Request: \$325,665

The City of Kirkland will use this grant to renovate the 2.75-acre Waverly Beach Park on the shores of Lake Washington. The City will remove a shoreline bulkhead, plant plants along the shoreline, and build pathways. Waverly Beach is Kirkland's oldest waterfront park and features a lifeguarded beach, lake access for non-motorized boating, playground, and picnic areas. The City's parks plan identifies this project as a high priority, and the City's Shoreline Master Program identifies Waverly Beach as an important shoreline restoration opportunity. The project will improve shoreline habitat for Chinook salmon and improve access to the waterfront for park users. The City of Kirkland will contribute \$325,665 from a voter-approved levy. [\(14-1748\)](#)

Seattle
Arboretum Waterfront Trail

Grant Request: \$475,000

The Seattle Parks and Recreation Department will use this grant to rebuild portions of a floating boardwalk and replace other trails with an elevated boardwalk on Foster Island in Washington Park Arboretum. The existing trail is the only passage over the largest wetland in Seattle and it's a key link in a larger trail network. With unparalleled views, it is frequented by bird watchers and wildlife photographers. School field trips and college classes occur here. The trail connects the arboretum with transit hubs and links two parts of the University of Washington Botanical Gardens by connecting the Union Bay Natural Area with the arboretum. The new boardwalks will protect the wetland from damage by trail users, increase public access to the area, and better connect users with the habitats they are experiencing. Foster Island contains marsh and shorelines that support western pond turtle, bald eagles, and Chinook salmon. The City of Seattle will contribute \$475,000. [\(14-1341\)](#)

**Kenmore
Log Boom Park and Water Trail Bridge Development**

Grant Request: \$105,702

The City of Kenmore will use this grant to build a bridge over a stream that separates two portions of Kenmore’s WaterWalk trail. The bridge also will connect the public portion of Harbour Village Marina and Log Boom Park. Providing this key missing connection to the Kenmore waterfront will improve the public’s access to Lake Washington shoreline. The City also will install interpretive signs in the waterfront park. The City of Kenmore will contribute \$105,703. ([14-1474](#))

**Port of Everett
Central Docks Public Trail Enhancements**

Grant Request: \$500,000

The Port of Everett will use this grant to improve its Central Docks Public Trail. The Port will build 810 feet of a multi-use, recreational trail; complete the last one-third mile of a second multi-use recreational trail; and build an over-water viewing platform that will be a cornerstone to the new 1.25-acre Pacific Rim Plaza. The work will bring the Port of Everett a step closer in its efforts to create a comprehensive public trail system along its waterfront. The trail enhancements will provide access to the largest marina in Washington State, with new public access points to the water’s edge and viewing of the entire inner harbor area. The trail also will be lined with interpretive signs denoting the area’s colorful history of mills, railroads, and environmental stewardship. The viewing platform will allow visitors to watch the marine life and the small boats coming and going. The platform’s railing area is envisioned to have telescopes and periscopes or other types of features for viewing harbor activities. The new infrastructure will be accented with railing, lighting, landscaping, and outdoor furniture. The Port of Everett will contribute \$1.9 million. ([14-1450](#))
