

# Washington Wildlife and Recreation Program

## Project List Fiscal Year 2006

# Interagency Committee for Outdoor Recreation

The Interagency Committee for Outdoor Recreation (IAC) serves the public by facilitating investments in outdoor recreation and natural resources. We do this through funding, technical assistance, planning, coordination, and advocacy. Our service reflects a commitment to public participation, openness, equity, and efficiency.

## IAC Committee Members

### Citizen Members

Val Ogden, Vancouver, Chair  
Bill Chapman, Mercer Island  
Karen Daubert, Seattle  
Jeff Parsons, Leavenworth  
Yvonne Yokota, Sequim

### Participating Agencies

Department of Natural Resources  
Parks and Recreation Commission  
Department of Fish and Wildlife

### IAC Director

Laura E. Johnson

### Address

Interagency Committee for Outdoor Recreation  
Natural Resources Building  
1111 Washington Street Southeast  
Olympia Washington 98504-0917

## Introduction

The Washington Wildlife and Recreation Program (WWRP)

WWRP was established by the Legislature in 1990 in response to increasing public demand for outdoor recreation land and growing concerns about loss of wildlife habitat. The primary goal of the program is "to acquire as soon as possible the most significant lands for wildlife conservation and outdoor recreation purposes before they are converted to other uses, and to develop existing public recreational land and facilities to meet the needs of present and future generations."

(RCW 79A.15.005)

Since 1990, more than \$405 million has been appropriated by the Legislature, resulting in thousands of acres of valuable wildlife habitat and some of the state's best recreation lands being placed into public protection. Many new recreational facilities have been provided, including neighborhood parks, ball fields, greenways, and hundreds of miles of trails for walking and biking.

The WWRP is administered by the Interagency Committee for Outdoor Recreation (IAC), an eight-member board consisting of five citizens appointed by the Governor, together with the Commissioner of Public Lands, director of Fish and Wildlife, and director of the Parks and Recreation Commission. The committee, through its professional staff and director, oversees a number of grant programs and also is responsible for statewide recreation and open space planning.

## Statutory Requirements

WWRP funding primarily comes from the sale of state general obligation bonds. State and local agencies qualify for WWRP grants. Local agencies include counties, cities, towns, port districts, tribes, park and recreation districts, and school districts. A 50 percent match is required from local agencies. As required by statute, funds are distributed equally to two accounts: the Outdoor Recreation Account and the Habitat Conservation Account. These accounts are in turn divided into a number of funding categories, each with its own statutory requirement.

The **Outdoor Recreation Account** is divided into four categories:

- 25 percent for acquisition, development, and renovation of **local parks** (at least 50 percent must be for land acquisition). Open only to local agencies.
- 25 percent for acquisition and development of **state parks** (between July 27, 2003, and June 30, 2009, at least 50 percent must be for land acquisition). Open only to State Parks and Recreation Commission projects.
- 15 percent for acquisition and development of **trails**. Open to both local and state agencies.
- 10 percent for acquisition and development of **water access** sites (at least 75 percent must be for acquisition). Open to both local and state agencies.
- The remaining 25 percent is classified as **unallocated** and is distributed by IAC to state and local agencies for high priority acquisition and development needs in the above categories.

The **Habitat Conservation Account** is divided into three categories:

- 35 percent for the acquisition and development of **critical habitat**. Open only to state agencies.
- 20 percent for the acquisition and development of **natural areas**. Open only to state agencies.
- 15 percent for the acquisition and development of **urban wildlife habitat**. Open to both local and state agencies.
- The remaining 30 percent is classified as **unallocated** and is distributed by IAC to local and state agencies for high priority acquisition and development needs in the above categories.

## Program Funding

The WWRP has proven to be a popular and successful program as demonstrated by the large number of agencies that participate each year in the highly competitive and demanding application process. In the current grant cycle (fiscal year 2006), 3 state and 54 local agencies applied for funding for 122 projects, totaling more than \$85 million.

In the 2005-2007 capital budget for WWRP, Governor Gary Locke recommended a \$36 million dollar appropriation. Based on this request, the Governor is presenting to the Legislature for approval a list of primary and alternate projects for the first year (fiscal year 2006). The first year is comprised of 56 local and state agency primary projects totaling \$35.7 million, matched by \$24 million. Additionally, 66 alternate<sup>1</sup> projects are included for approval.

Consistent with the statutory requirement to reserve a portion of the total WWRP appropriation for the second year of the biennium, principally for local governments, IAC has reserved \$225,000 of the \$36 million that Governor Locke requested. During 2005, local government project sponsors will enter into a second year (fiscal year 2007) competition for local parks acquisition. The Governor and Legislature will be provided a second-year list of projects for consideration during the 2006 legislative session.

As provided by statute, the Governor and Legislature can remove, but not add, projects to the IAC-recommended list of projects.

---

<sup>1</sup>The alternate project list is used, in rank order, when a project on the primary list cannot be undertaken or is completed under budget. Past history of the program indicates that some alternate projects will be funded.

# Directory of Projects (Alphabetical)

## Project Descriptions (In Rank Order, by Category)

*Note: The project cost and acres to be acquired in some cases are estimates only and may change as projects near completion. Alternate projects may be funded if primary projects on the list cannot be undertaken or are completed under budget. The cutoff between recommended and alternate projects is based on a total appropriation of \$36 million.*

---

Local Parks	WWRP Share	Sponsor Share	Total Cost
<b>Recommended</b>	<b>\$5,625,000</b>	<b>\$15,326,367</b>	<b>\$20,951,367</b>
<b>Alternates</b>	<b>\$5,487,708</b>	<b>\$11,522,083</b>	<b>\$17,009,791</b>

---

**Bremerton Parks & Recreation Department**      **\$140,000**      **\$150,080**      **\$290,080**  
**Bremerton Skatepark**

This grant will help renovate and expand an old skate park built on a basketball court. The skate park, which was the only one in Bremerton from 1996 to 2002, was created from mostly handmade, wooden, modular, equipment that deteriorated, became unsafe, and had to be removed. The new skate park will feature street elements and will be about 10,000 square feet in size with an adjoining restroom. The new park is centrally located in the existing Eastpark. The current Bremerton Parks & Recreation Comprehensive Plan states that additional neighborhood parks are needed, and one of the most requested is a skate park. For the past two years, Bremerton Skateboarders and Supporters United have been instrumental in acquiring about \$150,080 in matching funds from a design and construction company, skate clubs, and the Bremerton Central Lions Charitable Foundation. (04-1298D-FY06)

**Town of Cusick**      **\$189,802**      **\$192,658**      **\$382,460**  
**Cusick Community Park**

This grant will complete the third phase of a four-phase project to develop a community park. Phase three work includes building a skateboard park, basketball courts, playground, and picnic area with barbecues. It also will help pay to improve the swim beach, lighting, signs, and safety features. The earlier phases saw the development of a ballpark, boat launch, parking lot, and restrooms. The final phase will complete additional landscaping and signs, and develop an interpretive program. Partners include the Port of Pend Oreille, the Public Utility District, Pend Oreille County, the Cusick School District, the Kalispel Tribe of Indians, the Tri-County Economic Development District, the U.S. Forest Service, and a host of civic organizations, private businesses, and community members. (04-1449D-FY06)

**Seattle Parks & Recreation Department**      **\$300,000**      **\$3,124,055**      **\$3,424,055**  
**Myrtle Edwards Park Olympic Sculpture Park Expansion**

A 2-acre City of Seattle right-of-way and parking lot are poised to become the new entrance to Myrtle Edwards Park and the waterfront connection to the proposed Olympic Sculpture Park. This city waterfront property--now asphalt and parking meters--will create an anchor for new passive recreation in downtown Seattle, just 3 blocks from the Seattle Center. The grant will help pay for a 700-foot extension of both a pedestrian boardwalk and a bicycle trail that currently end abruptly in the parking lot. Work also will include landscaping with native plants, adding

signs, lights, park furniture, and a water fountain, and vastly improving access to the water--all accessible for people with disabilities. A grassy berm for seating and informal gathering at the water's edge will provide a seamless connector between popular Myrtle Edwards Park, which hosts 400,000 visitors a year, and the new sculpture park. In 2000, the city council appropriated \$2 million for improvements to this waterfront parcel. Also, the Seattle Arts Commission is donating in excess of \$1.6 million for development of this park. (04-1207D-FY06)

**City of Oroville** **\$30,380** **\$30,380** **\$60,760**  
**Oroville's Eastlake Ball fields**

The City of Oroville has needed additional ball fields for the past 15 years; however, affordable property has been scarce. The city acquired 12 acres and has leveled the property, installed irrigation, two backstops, and bases. This grant will add an additional backstop, portable pitching mounds, fencing, parking, player benches, bleachers, water service, and a trail around the park's edge, essentially making the fields playable. In the final phase of the project (not funded by this grant), the city plans to construct an administration building and restrooms, install outdoor lighting, and improve the gravel parking lot. (04-1174D-FY06)

**Bellingham Parks & Recreation Department** **\$300,000** **\$692,063** **\$992,063**  
**Squalicum Fields Development Phase 1**

This grant will help build a youth baseball field at Squalicum Fields. Work will include design and construction of the ball field, backstop, fencing, spectator seating, walkways, parking, signs, stream enhancement, landscaping, and other features. The city's parks plan identifies a need for 12 new youth and adult softball and baseball fields to meet future growth. This project, when complete, will provide an additional five games a week in addition to weekend games. In future phases, the city will add two lighted softball fields with dugouts, picnic areas, playgrounds, restrooms, salmon habitat enhancement, parking, and pavilion. (04-1444D-FY06)

**City of Puyallup** **\$300,000** **\$391,646** **\$691,646**  
**Bradley Lake Park Phase 3**

This grant will help the city complete Bradley Lake Park, a heavily used community park in the rapidly growing South Hill Mall area. The park provides a variety of recreational opportunities such as picnicking, walking, fishing, and birdwatching. In the final phase of this park's development, the city will pave pedestrian trails, construct two youth baseball fields, a restroom, and parking, and install landscaping and fencing. The city purchased this park in 1998 through a voter-approved bond and with a grant from the WWRP. In previous phases, the city paved pedestrian trails and built fishing docks, a picnic shelter, amphitheater, parking, a restroom, and all the necessary infrastructure. (04-1433D-FY06)

**Lacey Parks & Recreation Department** **\$240,000** **\$363,016** **\$603,016**  
**Regional Athletic Complex Field Lighting**

The City of Lacey will use this grant to light five baseball/softball fields and provide electronic scoreboards for them. The work is part of the development of a 67-acre regional sports complex that is a partnership between the City of Lacey and Thurston County. The first phase of construction, which includes the five fields, will be bid in 2004. The City and County created a Public Facilities District, which allows state sales tax to be diverted to a district formed by Lacey, Olympia, Tumwater, and Thurston County. A study of the area in the Public Facilities District showed more than 1,500 teams and 21,800 registered players but only four public baseball/softball fields with lights and three private fields. Of the teams participating in league

and tournament play, nearly half must leave the area to find adequate playing fields. (04-1044D-FY06)

**Kent Parks, Recreation & Community Service \$75,000 \$75,000 \$150,000**

**East Hill Skatepark Expansion**

The expansion of the Kent East Hill Skatepark is the result of a unique partnership between the City of Kent and the owners of an adjacent assisted-living housing complex. The partnership is allowing the city to expand by one acre its 2-acre skate park to create a multi-generational community park. The new, expanded park will reach across generational borders and be used by the entire Kent community, seniors living in the facility, and their families. The grant will help the City add climbing rocks, a walking trail, raised gardens, lawn bowling, bocce ball, a gazebo, and additional benches and picnic tables. (04-1419C-FY06)

**City of Sumas \$499,855 \$1,050,306 \$1,550,161**

**Bowen Field Expansion**

The City of Sumas will use this grant to quadruple the size of an existing 10-acre park that contains rodeo grounds and two softball fields. Access to the park and the parking lot are threatened by the imminent construction of a new state highway. The grant will allow the city to provide new access and new parking for the expanded park as well as two new softball fields, a soccer field, a restroom and officials' building, a footbridge linking the new 30-acre parcel to the old, trails, stormwater ponds, and shoreline enhancement. Eventual build-out of the site will include picnic facilities, more trails, a playground, a commons, and two more ball fields. The new acreage is ideal and unique. Baseball diamonds can be laid out to incorporate an existing stand of mature trees, giving the new park instant beauty. Trails planned by both the city and the county will travel to the park. The project is strongly supported by residents and businesses and has attracted large private donations. (04-1393C-FY06)

**Burien Parks & Recreation \$421,350 \$421,350 \$842,700**

**Rhododendron Park Acquisition**

A new neighborhood park will become a reality with this grant, which will buy the 6-acre Beckstrom Rhododendron Nursery property in an underserved area of Burien. Burien's parks plan calls for the addition of 48 acres, or 6-12 new neighborhood parks distributed throughout the city. The nursery property is a rare opportunity to provide a new park in a neighborhood that currently has no park resources of any kind. The 6 acres of gently sloping, undeveloped land is nestled in the heart of an established neighborhood. The concept plan for the park includes a playground, sport court, picnic area, play meadow, walking paths, stream access, a natural area, and parking. (04-1279A-FY06)

**City of Wenatchee \$198,500 \$205,000 \$403,500**

**Rotary Park Expansion**

The City of Wenatchee and the Wenatchee, North Wenatchee, and Sunrise Rotary clubs will use this grant to build a picnic shelter, playground, interactive water feature, amphitheater, and basketball court in Wenatchee's Rotary Park. Rotary Park is a new city venue that is being developed as a service project by the local Rotary clubs. The City, the Rotary clubs, and the Wenatchee North Neighbors Association are working on the first phase of the project (not part of this grant), which will be finished in June 2005. That phase entails environmental cleanup of the site, grading, path development, extension of Maple Street and sidewalks, establishment of irrigation and utilities, initial landscaping, and construction of a restroom. (04-1269D-FY06)

**Town of Tonasket** **\$129,000** **\$129,000** **\$258,000**  
**Tonasket B3 Skate and Bike Park**

The Town of Tonasket will use this grant to build a 10,000-square-foot skate park and an adjacent 50,000-square-foot dirt bicycle track in Chief Tonasket Park. The skate park will provide both street and freeform skate boarding, for all levels of expertise, and facilities for inline skating as well. The features will consist of a series of concrete bowls, pipes, ledges, spines, jump boxes, ramps, banks, steps, rails, walls, and grinding rails. The mountain biking track will have about 1,000 feet of straight runs and mounds designed in a series of curves and banks. Volunteers will do most of the construction under the guidance of the American Bicycle Association. Work will include fencing, a starting gate, a small building for storage and ticket sales, a water system, a paved staging area, an area for support vehicles, and bleachers for spectators. (04-1137D-FY06)

**Vancouver Parks & Recreation Department** **\$294,828** **\$294,828** **\$589,656**  
**Mount Vista Park**

Residents of Mount Vista will soon get a 4-acre park, thanks in part to this grant, which will be used to purchase the property. The residents live in a rapidly developing area near the Washington State University-Vancouver campus and Mount Vista Park will provide the only recreation opportunities in the area. The land slopes gradually, offering extensive views of the Cascade Mountains, Mount St. Helens, and Mount Adams. Mature Douglas fir, cedar, maple, and alder trees grace the property. Future improvements will include a perimeter trail, open play meadow, picnic tables, and children's play equipment. (04-1341A-FY06)

**Clark County Parks Department** **\$500,000** **\$4,980,754** **\$5,480,754**  
**Hockinson Meadows**

This grant will help purchase and take the first step in developing a 120-acre community park and sports complex at the northeast corner of Vancouver's urban growth boundary. More than 30,000 people live in the Hockinson Meadows area. The county's Sports Fields Master Plan identifies an immediate need for 23 youth baseball, 10 soccer, and 8 softball fields. Moreover, commercial development soon will eliminate six youth baseball fields. This grant will help provide a complex of multi-purpose athletic fields that will accommodate 15 youth baseball/softball, 10 youth soccer, and 3 adult soccer fields. The adult soccer fields can be used to provide an additional nine youth soccer fields. Other improvements will focus on families with young children who may be attending sports events or who otherwise wish to use this park. Facilities will include picnic tables, a shelter, play equipment, and trails. (04-1417C-FY06)

**City of Creston** **\$84,669** **\$84,897** **\$169,566**  
**Creston Multi-Sport Complex**

The Town of Creston would use this grant to build two tennis courts, a multi-purpose court, and a 9,000-square-foot skate park complete with a mini half pipe, grind rails, and bank ramps. Ranked as the highest priority by residents of Creston and the Creston School District, this project will allow the city to build tennis courts for use by the Wilbur/Creston tennis team, which currently use courts in Wilbur, 8 miles away, that are in severe need of repair. The multi-purpose court would serve the Creston School District Area. The skate park will be the only one located in Lincoln County. The nearest ones are about 50 miles away. (04-1359C-FY06)

**Des Moines Parks & Recreation Department    \$177,071            \$177,954            \$355,025**  
**Steven J Underwood Ballfield Lighting**

The City of Des Moines will add lighting to a competition-level softball field and build a restroom at the newly opened Steven J. Underwood Memorial Park. Maximizing field use by adding lights is critical because Des Moines has 60 percent fewer sports fields per capita than the surrounding cities of Federal Way, SeaTac, and Kent. Restrooms to replace the use of sani-cans will improve spectator comfort. Having lighting to compensate for cloud cover and shortened daylight in the fall and winter will enhance game safety and lessen the need for local teams to search for practice and game fields away from home. Outstanding community involvement is the hallmark of Steven J. Underwood Memorial Park. Each phase of the park's development has had a broad base of support from the Interagency Committee for Outdoor Recreation's Youth Athletic Facility grants, Community Development Block grants, King County REET and Youth Sports Facility grants, South Highline Little Leagues, Des Moines Midway Soccer Club, Des Moines Legacy Foundation, Des Moines Police and Fire Fighters Guilds, Starbucks Coffee Company, and Des Moines Rotary Club. (04-1391D-FY06)

**City of Connell    \$329,660            \$338,840            \$668,500**  
**Pioneer Park Expansion**

The City of Connell has the opportunity to purchase additional property to expand Pioneer Park to develop two new softball fields and to enhance use of the existing swimming pool. The grant will not only help purchase the land but will help pay for the removal of a street and construction of two softball fields, parking, bleachers, pathways, and expanded pool facilities including a larger slide and a splash area for smaller children. This expansion of Pioneer Park addresses the city's need for more ball fields. (04-1355C-FY06)

**Vancouver Parks & Recreation Department    \$300,173            \$300,173            \$600,346**  
**Lakeshore Park**

The City of Vancouver will be able to create a neighborhood park by using this grant to help purchase a little more than five acres in a heavily developed residential area in west Vancouver known as Lakeshore. The neighborhood is fully developed, and the project site provides the only opportunity for a neighborhood park. The park, which is a flat open meadow, will serve about 4,000 people. Future improvements will include multi-use sports fields, walking trails, children's play equipment, picnic tables, and a sports court. (04-1332A-FY06)

**Tacoma Public Works                                    \$300,000            \$688,800            \$988,800**  
**Thea Foss Waterway—21st Street Park**

This grant will help complete the initial phase of the Thea Foss Waterway Public Esplanade, which serves thousands of visitors annually on Tacoma's waterfront. It provides 2.5 acres of much needed waterfront park space at the southern end of the waterway and includes walkways, benches, picnic areas, water access, small boat access, landscaping, parking, and other features. This project is part of the restoration of Tacoma's downtown waterfront. The esplanade, which provides continuous public access to the waterway, serves the 10,000 people living within a mile of the project and thousands of more daily users who include workers, students, tourists, and visitors to the three nearby museums, the Tacoma Dome, Union Station, the Tacoma Dome Station Regional Transit Center, Link Light Rail, the new Tacoma Convention Center, and the Thea Foss Waterway marinas. (04-1381D-FY06)

**Vancouver Parks & Recreation Department      \$191,527              \$191,527              \$383,054**  
**East Mill Plain**

The City of Vancouver will use this grant to help develop a 2-acre neighborhood park in a densely populated residential neighborhood of east Vancouver. There are no other parks or public open spaces within the area, which serves about 3,500 residents. The park, which will have a skate park, basketball court, picnic tables, children's play equipment, benches, and walking paths, also will be home to the city's East Precinct Police Station. (04-1408D-FY06)

**Kennewick Parks & Recreation Department      \$7,989              \$8,354              \$16,343**  
**Columbia Park Regional Youth Skate & Bike Park**

Located in the heart of the Tri-Cities, Columbia Park will be renovated to create a place for kids to skateboard, in-line skate, ride mountain bikes, and play basketball. The city will turn an old concrete tennis court into the new skate/bike area, complete with evening lighting. The newly renovated area will keep kids part of other family activities in the park. The pre-engineered steel system for skating allows modification of the ramp location and low maintenance of the ramps. It allows for easier conversion in the future, for different uses and the addition of ramps as use demands. The Tri-Cities has one small skate park in Kennewick that is over utilized. This proposal will design for, and has room to accommodate, all 'wheeled' users. This project was partially funded. The remainder of the project is listed under "Alternates." (04-1202D-FY06)

**Seattle Parks & Recreation Department              \$63,869              \$175,671              \$239,540**  
**Ercolini Park Acquisition**

The City of Seattle will use this grant to complete the purchase of a little more than half an acre in West Seattle for a neighborhood park. The land is flat and lies west of the West Seattle Junction Hub Urban Village. Its purchase and development will address the needs of the increasing population within this urban village, which has no usable open space within easy walking distance. This property will complete an action item in the city's Pro Parks Levy approved by citizens. This project was partially funded. The remainder of the project is listed under "Alternates." (04-1060A-FY06)

Alternates

**Kennewick Parks & Recreation Department      \$167,011              \$167,011              \$334,022**  
**Columbia Park Regional Youth Skate & Bike Park**

Completes funding for the regional skate and bike park. See full project description listed above. (04-1202D-FY06)

**Sunnyside Parks & Recreation Department      \$51,850              \$51,900              \$103,750**  
**SunnyView Skatepark**

A new skate park will be built in SunnyView Park, midway between Sunnyside and Grandview on Yakima Valley Highway. Owned by the City of Sunnyside, SunnyView Park is equipped with soccer and softball fields, playground equipment, and restrooms. The skate park has been in the planning stages for nearly six years, during which the Yakima County Parks Department, Sunnyside and Grandview city staff, the Lower Yakima Valley Rural Enterprise Community, and dozens of community volunteers have been raising money, surveying kids, and planning the

park. The skate park will have five steel obstacles, which can be moved to provide challenges for beginning and experienced skaters alike. (04-1320D-FY06)

**Clark County Parks Department** **\$300,000** **\$4,557,033** **\$4,857,033**  
**Pacific Community Park**

Clark County will use this grant to develop a 50-acre community park in the heavily developed residential areas of east Vancouver. The area includes eight neighborhoods, home to more than 30,000 people. Pacific Community Park, the only community park in the area, will be equipped with a skate park, basketball court, children's play equipment, benches, picnic tables and two shelters, more than 2 miles of trail, landscaping, and support facilities. (04-1406D-FY06)

**Seattle Parks & Recreation Department** **\$300,000** **\$330,000** **\$630,000**  
**Lower Woodland Skate Park Phase 1**

Seattle's proposal is to develop a premier public skateboard park at its popular Lower Woodland Park, just southeast of Green Lake Park. This grant will help pay for the first phase of development, which include adding the basic infrastructure for the full project, improving adjacent features, and completing 14,000 square feet of the overall 23,000-square-foot planned skate park. Ultimately, the skate park will include bowl and street skating features, a viewing area with benches for spectators, fencing, and signs. (04-1204D-FY06)

**Seattle Parks & Recreation Department** **\$181,131** **\$434,329** **\$615,460**  
**Ercolini Park Acquisition**

Completes funding for the park acquisition. See full project description listed above. (04-1060A-FY06)

**Kennewick Parks & Recreation Department** **\$300,000** **\$300,000** **\$600,000**  
**Hansen Park—Amenities and Development**

Kennewick will use this grant to build a restroom, playground equipment, picnic shelter, walkways, trail, park furniture, utilities, and parking for a 25-acre, grassed neighborhood park. The acquisition and development of a park in this neighborhood was listed as the city's top park need. There is only one other 1/4-acre park in this neighborhood of more than 8,000 residents. The park was a result of an agreement with a developer building houses in the area. The city acquired 12 acres and the developer donated an additional 13 acres and graded the site, installed the irrigation system, and planted grass. (04-1385D-FY06)

**Pend Oreille County** **\$110,775** **\$117,819** **\$228,594**  
**Pend Oreille County Park Phase 1**

With this grant, Pend Oreille County will be able to begin development of 440 acres of forestland, which includes a stand of old growth trees. The site's vegetation has been maintained in a near natural state since concerned citizens donated the property in the 1920s. The first phase of development will include improvements to the water system, new underground electrical utilities, construction of a restroom and 8 miles of non-motorized trail, and relocation and improvements to a day-use area. Located adjacent to U.S. Highway 2 and north of the Spokane County line, the park is part of a regional recreational network, including the International Selkirk Loop and the "Gateway to Pend Oreille" theme. The local Public Utilities District will install the underground utilities. Park user groups, the Conservation District, local schools, and youth groups support the environmental education activities at the park. (04-1451D-FY06)

**Burien Parks & Recreation** **\$300,000** **\$446,006** **\$746,006**  
**North Ambaum Park Development**

Burien will use this grant to develop the 1-acre North Ambaum Park property into a new neighborhood park. Burien's parks plan identified the need for 48 acres, or 6-12 new neighborhood parks distributed throughout the city. The North Ambaum property is in an area with no park services. The land is level, cleared, undeveloped and is an established neighborhood surrounded mostly by low-income apartments. The park is intended to provide active recreation and a gathering place. It will have a playground, basketball court, picnic area, lawn, and parking. (04-1280D-FY06)

**Kent Parks, Recreation & Community Service** **\$120,924** **\$120,925** **\$241,849**  
**Eagle Creek Neighborhood Park**

This grant will allow Kent to develop the Eagle Creek Neighborhood Park on the east hill of Kent. The park is highly visible for the community and adjacent to a 5-acre wetland that is associated with a salmon-bearing stream. This park and open space create a great opportunity for further connectivity to the wetland and stream to the north. (04-1382D-FY06)

**City of Kettle Falls** **\$103,325** **\$104,000** **\$207,325**  
**Downtown Water/Skate Park**

The City of Kettle Falls will expand its downtown park and build a water park, a skate park, picnic area, and walkways and install landscaping. A fire recently destroyed a local business and created an opportunity for the city to start revitalizing a declining downtown neighborhood. Support for this project has been overwhelming. Local civic groups such as the Chamber of Commerce, Rotary, Lady Lions, the school district, and a youth group called 'Skate Free USA' have raised more than \$20,000 in cash and more than \$20,000 in donated materials and labor. (04-1344D-FY06)

**Fife Parks & Recreation** **\$70,775** **\$80,775** **\$151,550**  
**Wedge Park**

Putting the finishing touches on a neighborhood park is the focus of this grant. Fife will use this grant to build a trail, play and picnic areas, a climbing structure, gazebo, and parking in a 1-acre neighborhood park. Fife has been impacted by large residential, commercial, and industrial development. The development of this park will help bring needed recreation opportunities to this part of the city. The park eventually will connect to an adjacent creekside habitat restoration area that has been under development for two years. (04-1363D-FY06)

**Spokane County Parks & Recreation** **\$74,913** **\$74,913** **\$149,826**  
**Spokane County Aquatic Facility**

Slippery water slides will be added to an outdoor pool now under construction in north Spokane County with this grant. The unincorporated areas of Spokane County, with a population of 119,357, have one outdated swimming pool with no water features. Interactive water features have become a very popular draw for successful outdoor aquatic recreation facilities. The Parks Department has held several meetings with literally hundreds of area families who identified the water slide as the most desired amenity for the pool. Many residents helped clean up the site and donated equipment and materials for the pool's construction hoping that a grant will pay for the water slide. The land seller donated \$122,187 to the county to improve the property. (04-1271D-FY06)

**Kent Parks, Recreation & Community Service \$300,000 \$400,000 \$700,000**  
**West Hill Park Development**

Kent will use this grant to develop 3 acres of a 7-acre neighborhood park on the city’s west hill. Planned development will include play equipment, park furniture, a restroom, parking, lighting, landscaping, trails, open play field, and fencing. The remaining four acres are a heavily forested hillside, which will remain in its natural state. The park will serve about 2,300 people. (04-1364D-FY06)

**Olympia Parks, Arts & Recreation \$250,000 \$265,290 \$515,290**  
**Grass Lake Refuge Phase 1 Development**

The grant will construct an entry kiosk with interpretive signs, two environmental learning stations--a pier and wildlife blind--a trail, and habitat improvements for use by thousands of residents, school groups, and other visitors. In 1990, the Friends of Grass Lake worked with the city to obtain a court order and funds to protect this unique, 165-acre wetland complex. The refuge’s master plan recognizes the refuge's importance for habitat protection and environmental education and interpretation. Careful facility design and management will secure these values for generations. The grant is matched by impact fees, utility taxes, and donations from the Park, Arts and Recreation Organization, Friends of Grass Lake, Batdorf and Bronson Coffee Roasters, Earth Service Corps, Stream Team working through the Volunteers In Parks, and other volunteer groups. (04-1394D-FY06)

**City of Gig Harbor \$500,000 \$500,000 \$1,000,000**  
**Skansie Brothers Park Phase 2**

The City of Gig Harbor will use this grant to continue buying property for the Skansie Brothers Park. The land will expand Jerisich Park and dock, which is the city's only public moorage facility. It provides transient moorage, sewage pumpout services, and restroom and picnic facilities in downtown Gig Harbor. Buying this property will add a little more than a half acre of grassy area to the park, including 100 feet of waterfront. The waterfront property is suitable for fishing, canoeing, and direct access to the water. The upland portion will allow for picnicking and public gatherings along the waterfront. (04-1404A-FY06)

**City of Fairfield \$37,918 \$37,918 \$75,836**  
**Fairfield Skatepark**

Kids in Fairfield soon will get a skate park, thanks to this grant. The City plans to expand Hart Park by building a 7,500-square-foot skate park and upgrading the park for people with disabilities. The skate park will be used by the surrounding communities of Rockford, Latah, Waverly, Spangle, and Freeman. The project enjoys wide support with endorsements from the Fairfield Town Council, local merchants, and the Hangman Creek Chamber of Commerce which includes the towns of Rockford, Waverly, Latah, and Spangle. The City has received numerous grants, including a \$1,000 grant from the Tony Hawk Foundation, \$8,659 from Spokane County Parks & Recreation, and \$2,000 from Avista Foundation. (04-1297D-FY06)

**City of Chelan \$90,000 \$90,000 \$180,000**  
**Community Field Improvement**

Chelan and the Lake Chelan School District are teaming up to improve the Community Field by leveling and reseeding the land, and replacing the irrigation system, backstops, soccer goals, a retaining wall, fencing, lighting, and pathways. The fields are used by the school, city league soccer, baseball, and softball teams, and numerous youth groups. They also serve as a

community open space. Although maintenance is regularly performed, the heavy use of these fields by the community has made this extensive renovation necessary. (04-1435D-FY06)

**Snohomish County Parks Department                      \$300,000                      \$307,000                      \$607,000**  
**Whitehorse Community Park Ball Fields**

Adding two baseball fields to the existing one in this 82-acre park will be accomplished with this grant. Apart from a school ball field, there is only one other baseball field that serves the community. With new housing development and the growing population within the area, there is a greater need for fields. Work include landscaping; installing irrigation, backstops, dugouts, fencing; and improving the access road. There is a strong support from the sports leagues, service groups, businesses, and the Darrington community. (04-1368D-FY06)

**Snohomish County Parks Department                      \$300,000                      \$548,608                      \$848,608**  
**Paine Field Park Development**

Snohomish County will use this grant to build a soccer field on 5 acres of Paine Field Park and add parking and lighting. Snohomish County acquired the 7-acre Mukilteo Little League site and an additional 7 acres from the Snohomish County Airport to develop as a community park. The community listed improving the quality of the ball fields as the highest priority for improvements, with new lighting identified as number one and development of a competition-level soccer field as number two. (04-1334D-FY06)

**Snohomish County Parks Department                      \$150,000                      \$195,000                      \$345,000**  
**West Monroe Sports Facility**

Snohomish County will use this grant to help buy 38.6 acres for a sports facility outside the city of Monroe. The targeted property is near the site of a future elementary school and a city park. The need for sports fields is high in Monroe. Currently 10 city fields and a handful of school and private fields are all that exist and they are used heavily. Leagues have been seeking private land, often farmland, for use as fields. The Sky River Soccer Club has agreed to maintain the facility. (04-1336A-FY06)

**City of Medical Lake    \$47,335    \$47,335    \$94,670**  
**Coney Island Park Phase 3**

Historically, Coney Island Park was the end of the line for the trolley that came from Spokane bringing people to the lake resort for boating, swimming, dancing, camping, and other activities. Before this project, the beach had become littered with trees and jagged chunks of concrete left behind from an old boat house. This grant will allow the City to complete the park's restoration by providing access to the park for people with disabilities, improving the picnic facilities, and adding a drinking fountain and lighting. The project will protect the historical value of the park and create a community gathering space for the City's Annual Christmas Tree Lighting and lunch-time visitors. (04-1392D-FY06)

**Kitsap County Parks and Recreation                      \$500,000                      \$1,414,835                      \$1,914,835**  
**North Kitsap Heritage Park**

In its 2000 Park, Recreation and Open Space Plan, Kitsap County documented significant deficiencies in virtually all elements of park and open space facilities in the county. The plan called for the county to provide large, regional "Heritage Parks," which are a minimum of 300 acres and are to remain largely undeveloped to provide for passive recreation and preservation of environmentally sensitive areas. Since adopting the plan, the county has acquired park sites in

south and central Kitsap, but not in the north part of the county. This grant will allow the county to purchase 426.11 acres for a Heritage Park. The site is in the major population centers of Poulsbo, Bainbridge Island, Kingston, and Indianola. (04-1456A-FY06)

**City of Burlington** **\$444,329** **\$444,329** **\$888,658**  
**Burlington Northern Landing Acquisition**

This grant will allow Burlington to buy about 5 acres of land adjacent to the Skagit River for a much needed river public access site. This land is at the eastern end of a mile-long shoreline development program called "Burlington Riverwalk." The project will buy land within a levee setback area and add them to 5 acres owned by Dike District #12. The future development of a day use, river access area on the 10-acre site will provide recreation opportunities not provided at the adjacent 132-acre Skagit River Park. The site has historically been an informal river access point, particularly during fishing season. The first phase of development creates parking away from the shoreline, separating pedestrians and river users from vehicles. A future phase adds an information kiosk, trail connections, picnic tables, and restrooms. The project is a partnership between the City of Burlington and Dike District #12. (04-1420A-FY06)

**Snohomish County Parks Department** **\$487,422** **\$487,422** **\$974,844**  
**North County Ball Fields**

Snohomish County's Comprehensive Park Plan highlighted the need for athletic facilities throughout the county. This grant would allow the county to buy a 21-acre site located between the cities of Marysville and Arlington, that would accommodate up to four soccer fields, two baseball complexes with associated parking, a perimeter jogging path, and a children's play area. Both Marysville and Arlington are experiencing significant growth in population as well as soccer and Little League Baseball participation. (04-1383A-FY06)

State Parks	WWRP Share	Sponsor Share	Total Cost
<b>Total Recommended</b>	<b>\$5,625,000</b>	<b>\$0</b>	<b>\$5,625,000</b>
<b>Total Alternates</b>	<b>\$5,171,681</b>	<b>\$0</b>	<b>\$5,171,681</b>

**Deception Pass Sunrise Resort Phase 2                      \$1,103,125              \$0                      \$1,103,125**

Deception Pass State Park, the most-visited state park in Washington, will use this grant to purchase land for new administrative offices and complete the acquisition of Sunrise Resort. Acquisition of the resort will allow State Parks to move administrative operations from their present location, which has historic, scenic, and recreational qualities better used for visitors. Deception Pass State Park is a 4,174-acre marine and camping park with 77,000 feet of saltwater shoreline and freshwater shoreline on three lakes in Island County. Rugged cliffs drop to meet the turbulent waters of Deception Pass. The park has breathtaking views, old-growth forests, and abundant wildlife. (04-1234A-FY06)

**Kanaskat-Palmer Campground Expansion                      \$1,400,000              \$0                      \$1,400,000**

Camping sites at Kanaskat-Palmer State Park in King County will be developed with the help of this grant. The popular campground will expand by 50 to 60 sites, most of which will include electrical hookups and be large enough to accommodate modern recreational vehicles. Some sites may be set aside for use by tent campers. A restroom with showers will be built in the center of the campground loop. Although the campground is not on the water, campers have access to more than 2 miles of shoreline on the Green River. Kanaskat-Palmer State Park is a 262-acre camping park on a small, low plateau in a forest. (04-1240D-FY06)

**Inholdings & Adjacent Properties                                      \$500,000              \$0                      \$500,000**

Every biennium, opportunities arise for State Parks to obtain small properties, typically less than \$100,000. This grant will allow State Parks to buy land that may be key to protecting or enhancing an existing park. These parcels are typically too small to compete effectively as an individual acquisition. Previous acquisitions have obtained valuable additions in natural resource and recreation opportunities to existing parks, alleviated the risk of neighbors converting adjoining land to uses incompatible with park purposes, and improved access to park land. (04-1235A-FY06)

**Cape Disappointment Multi-Use Trail                                      \$1,800,000              \$0                      \$1,800,000**

State Parks will use this grant to construct 2 miles of trail to connect the soon-to-be-completed Lewis and Clark Discovery Trail to the main hub of Cape Disappointment State Park, which contains the park administrative offices, a campground, boat launch, interpretive facilities, and beach. The new trail will be separated from, but running mostly parallel to State Route 100. Cape Disappointment State Park is at the mouth of the Columbia River in Pacific County and is a key site along the Discovery Trail, which runs from Ilwaco's waterfront to the state park and then northerly along the beach to Long Beach. The trail will provide a safe route into the park and a significant expansion of recreational opportunities for visitors. Due to difficult terrain and consideration of marbled murrelet habitat, extraordinary design and construction considerations will be necessary. (04-1270D-FY06)

**Pearrygin Lake Shoreline Acquisition                      \$821,875                      \$0                      \$821,875**

Preserving the serenity of Pearrygin Lake State Park is the goal of this grant. State Parks will buy 84.1 acres adjacent to the southwest shoreline of Pearrygin Lake, preventing establishment of a subdivision and preserving the scenic landscape. Pearrygin Lake State Park is a 584-acre camping park in the Methow Valley in Okanogan County. The park features expansive green lawns leading to 7,500 feet of waterfront on Pearrygin Lake. The lake offers swimming, fishing, and boating. This project was partially funded. The remainder of the project is listed under “Alternates.” (04-1198A-FY06)

Alternates

**Pearrygin Lake Shoreline Acquisition                      \$478,125                      \$0                      \$478,125**

Completes funding for this acquisition. See full project description listed above. (04-1198A-FY06)

**Green River Gorge 05-07 Acquisitions                      \$1,500,000                      \$0                      \$1,500,000**

This grant will allow State Parks to purchase 158 acres of land in the Green River Gorge, which was established as a conservation area by the Legislature in 1969. The Legislature directed purchase of a 12-mile strip of land that incorporates the visual basins of the Green River from the Kummer Bridge to Palmer. With this grant, State Parks will purchase the Kanaskat-Palmer/Jellum Connection, formerly owned by Plum Creek Timber, and recently purchased by La Terra Limited Partnership. This parcel is a critical inholding, lying between the Green River and land managed by the state Department of Natural Resources. It provides a connection at the plateau level between the development at Kanaskat-Palmer and State Park ownership at Jellum, 2 miles west. It also links with private land, currently targeted for acquisition by the county and cooperating nongovernment organizations. (04-1268A-FY06)

**Deception Pass Cornet Bay/Hoypus Pt. Day Use \$392,466                      \$0                      \$392,466**

State Parks will use this grant to revamp a day-use area in Deception Pass State Park. Work will include converting a road from Cornet Bay to Hoypus Point into a pedestrian, multi-use trail. At the Cornet Bay end of the road, State Parks will build a picnic shelter, a fish cleaning station, a kayak launch site, a park shuttle bus shelter, and a garbage collection station. At the Hoypus Point end, State Parks will add an outhouse, picnic sites as well as interpretive signs. Deception Pass State Park is a 4,174-acre marine and camping park with 77,000 feet of saltwater shoreline and freshwater shoreline on three lakes in Island County. Rugged cliffs drop to meet the turbulent waters of Deception Pass. The park is outstanding for breath-taking views, old-growth forests and abundant wildlife. (04-1253D-FY06)

**Cape Disappointment Seaview Dunes Ph 2                      \$981,235                      \$0                      \$981,235**

Preserving the view of dunes from the Discovery Trail, commemorating the Lewis and Clark expedition, is the goal of this grant. State Parks will use this grant to purchase 10 acres of a 27-acre parcel of the Seaview Dunes, which parallel the trail. The current landowner is seeking permits to build condominiums. State Parks received a grant in 2002 to buy other property along the trail and is in the process of purchasing land from four people, who have agreed to sell, pending appraisals. One significant property, the 27-acre parcel, remains in this area. Remaining

funds in the current grant are not adequate to cover the entire cost of this property, and State Parks is seeking additional funds to make up the difference and complete the acquisition. The parcel lies between the northern boundary of Cape Disappointment State Park in Pacific County and the Seaview Approach Road. (04-1237A-FY06)

**Cape Disappointment Gateway Center                      \$419,750                      \$0                      \$419,750**

In 2004 the State Parks and Recreation Commission approved a master plan for Cape Disappointment State Park in Pacific County. A central component of the plan involved creating a visitor center near Ilwaco, called the Gateway Center. The center would serve as the visitor orientation site and house the park shuttle service and some administrative buildings. State Parks has found property and willing sellers. This grant will help purchase the property. (04-1339A-FY06)

**Rockport Trillium Property Acquisition                      \$1,400,105                      \$0                      \$1,400,105**

Rockport State Park is a 460-acre camping park in an ancient Skagit County forest. The old growth was never logged, and the entire ecosystem remains in place, creating a rare, natural forest with a canopy so dense that minimal sunlight penetrates to the ground. The park stands at the foot of Sauk Mountain, which has an elevation of 5,400 feet and a steep but climbable trail to the top. This grant will allow State Parks to buy 645 acres of commercial forest on the south side of Sauk Mountain, completing an important connection between Rockport and the Mount Baker Snoqualmie National Forest. Development opportunities consist of camping and day-use facilities with spectacular views of the river valley and trails that would connect to the existing trail system at Sauk Mountain, creating opportunities for hiking, biking, cross-country skiing, and snowshoeing. (04-1256A-FY06)

**Olympia Parks, Arts & Recreation**                      **\$300,000**                      **\$762,303**                      **\$1,062,303**  
**Olympia Woodland Trail Phase 1 Development**

Olympia’s Woodland Trail Phase 1 Development will create a long treasured capital city legacy and Olympia's first link in the regional urban trail system being developed by Olympia, Lacey, Tumwater, and Thurston County. Trail users will be able to walk or bike from beautiful parks on Capitol Lake through a greenway corridor to the Chehalis-Western Trail and Chambers Lake parks. This grant will help pay for Phase I, which develops the trail along a 1.8-mile-long abandoned railroad track through an urban forest sanctuary created by the scenic Indian Creek ravines. The grant also helps build a trail head, complete with restroom, shelter, information kiosk, bike and vehicle parking, and service access. The 250-members of the Woodland Trail Greenway Association, a advocacy group, have donated cash, materials, and thousands of hours to interim improvements. (04-1415D-FY06)

**Okanogan County Public Works**                      **\$688,666**                      **\$688,670**                      **\$1,377,336**  
**Similkameen Connector Trail Phase 1**

The Similkameen Connector Trail begins in the historic mining town of Nighthawk, runs parallel to the Similkameen River, through a tunnel past the historic 1907 Enloe Dam, over a bridge and into Oroville. With this grant, Okanogan County will acquire 18 properties, either through easements or purchase, develop a 7-mile section of the trail, and construct a trail head at Nighthawk. This is the first step in development of this trail. The Similkameen Connector Trail is a non-motorized trail on an abandoned railroad track and it offers spectacular views of the river and the Cascade Range in the Pasayten Wilderness. The trail will serve as a connector to the Pacific Northwest Trail system and the extensive trail system within Okanogan County. Partners in this project include the Pacific Northwest Trail Association, private clubs, and other interest groups. (04-1441C-FY06)

**Redmond Parks & Recreation Department**                      **\$181,525**                      **\$181,525**                      **\$363,050**  
**Bear Creek Trail—The Missing Link**

Redmond will use this grant to buy a .81-acre parcel and a trail easement, completing a 1.6-mile portion of the Bear Creek Trail corridor. This segment and others constitute the Bear & Evans Creek Trail & Greenway, which is a 9-mile trail project being acquired and developed in phases. The overall project connects to other Redmond and King County trails and will create loops in and around the city. (04-1241A-FY06)

**Shoreline Parks & Recreation Department**                      **\$1,215,000**                      **\$1,215,000**                      **\$2,430,000**  
**Interurban Trail—North Central Segment**

The Interurban Trail is a multi-jurisdictional recreational trail that provides a vital north-south link in the regional Puget Sound trail system. The Shoreline portion of the trail is 3 miles long and extends from the Shoreline’s boundary with Seattle on North 145th Street, north to the Snohomish County line. With this grant, Shoreline will design and construct the final 0.85-mile

section of the north central segment (N 175th to N 192nd). Work will include landscaping, installing historical interpretative signs, and building neighborhood connections. The Shoreline Interurban Trail runs through an area of significant residential population (about 5,000 people per square mile), and will connect people to services, other modes of transportation, employment, and housing. It will fill a great safety need for bicyclists and others seeking a recreational trail. (04-1211D-FY06)

**City of Buckley** **\$123,442** **\$123,442** **\$246,884**  
**Buckley Foothills Trail Extension**

The City of Buckley plans to complete development of the regional Foothills Trail within its city limits. The trail now ends at the Buckley National Guard Armory on River Avenue and this project will extend the trail by 2,400 feet. Work will include paving the trail, making level landings, and installing signs. This segment will run north from the Armory along the abandoned railroad grade to the southern boundary of the Puget Sound Energy flume to the River Avenue right-of-way, where it crosses the flume, then continues north on River Avenue right-of-way to the south side of the White River, ending at Riverside Park. Future plans include a collaborative effort by Pierce and King counties and the cities of Enumclaw and Buckley to construct a bridge at the end of this segment. Another trail segment north of the White River in King County will link this trail with a similar project currently being undertaken by Enumclaw. This project is a vital link in the regional Foothills Trail System. (04-1440D-FY06)

**Snohomish County Parks Department** **\$1,541,367** **\$2,098,021** **\$3,639,388**  
**Centennial Trail—Arlington North**

The Snohomish County Centennial Trail - Arlington North adds 9 miles of paved, multipurpose, non-motorized trail and a parallel equestrian trail on county-owned abandoned railroad right-of-way north from Arlington to Skagit County. This adds to a 7-mile completed trail section between the cities of Snohomish and Lake Stevens and a 9-mile trail section currently under construction between the cities of Lake Stevens and Arlington. Planning and engineering for the Arlington North section is 90 percent complete and the project has entered the permit process. The trail was planned with the assistance of the Snohomish County Trail Coalition in 1996 and is supported by the cities of Arlington and Lake Stevens, local chambers of commerce, equestrians, and bike organizations. The trail crosses the Stilliguamish River north of Arlington, links with the Whitehorse Trail, continues past Bryant Lake through the historic Town of Bryant, crosses Pilchuck Creek over a bridge at the historic Town of Pilchuck, and heads through forested rural areas to a 100-acre trail head at the Skagit County line, connecting with Skagit County's Centennial Trail. This project was partially funded. The remainder of the project is listed under "Alternates." (04-1340D-FY06)

## Alternates

**Snohomish County Parks Department**                      **\$208,633**                      **\$283,979**                      **\$492,612**  
**Centennial Trail—Arlington North**

Completes funding for the Arlington North project. See full project description listed above.  
 (04-1340D-FY06)

**City of Moses Lake**    **\$342,318**                      **\$342,319**                      **\$684,637**  
**Heron Trail Phase 1 Boardwalk**

With this grant, Moses Lake will build part of Heron Trail, a 1.2-mile nature trail that will serve as a connector between parks and key locations throughout the city. The trail will be a combination of asphalt and boardwalk segments over wetlands. The hub for Heron Trail is McCosh Park, which is the most active waterfront park in Moses Lake. Located in the downtown area, the park is home to the Moses Lake Aquatic Center and contains an amphitheater, basketball and tennis courts, a playground, restrooms, and the old Swedberg pool house. Within the park, Heron Trail will follow the northern shoreline of Pelican Horn and connect to the Japanese Gardens, Frontier Middle School, downtown shopping and restaurants, neighborhoods, and other trail heads. The boardwalk will include a viewing platform. Partners in this project include Vision 2020, the Trail Planning Team, Lioness, Rotary, Audubon Society, and the Association of Realtors. (04-1446C-FY06)

**Kitsap County Parks and Recreation**                      **\$639,200**                      **\$639,200**                      **\$1,278,400**  
**Hansville Greenway Phase 2**

Kitsap County will use this grant to buy 225 acres, tying it to the 175-acre Hansville Greenway and its 4 miles of trails to Hood Canal, Puget Sound, and Point No Point Park. The Hansville Community has been working proactively to preserve its special places and to create a system of trails that provide access to those places. This purchase provides for 5 miles of trails and contains 22 acres of wetlands and 2 miles of streams. These are the last acres required to complete the greenway, and are under the ownership of a landowner with plans to develop the area. The landowner has indicated a willingness to donate about 9,000 feet of trail easement as part of this acquisition. The Hansville Community has worked with the Trust for Public Lands to secure an option on this property on the county's behalf. (04-1458A-FY06)

**Pierce County Parks & Recreation**                      **\$300,000**                      **\$470,400**                      **\$770,400**  
**Cushman Trail**

Pierce County, in partnership with Gig Harbor, will use this grant to extend a trail 4 miles through Gig Harbor and portions of the county. The extension will connect to a proposed new Gig Harbor History Museum and the Rosedale farm, an early 1900s farm with house, barn, fruit orchards, and farm machinery of that era. Further on, the trail will connect directly to the many shops, restaurants, and the Harbor itself, ending at the Gig Harbor North Shopping Center. This shopping center is a large center planned for the 14,000 new residents proposed in that area. The trail with all its amenities will give the community and its visitors the opportunity to shop, recreate, and use the trail as an alternate form of transportation. (04-1194D-FY06)

**Jamestown S'Klallam Tribe** **\$131,033** **\$131,033** **\$262,066**  
**Olympic Discovery Trail: Jamestown S'Klallam Tribal Segment**

The Jamestown S'Klallam Tribe will use this grant to build a quarter-mile of the Olympic Discovery Trail, a regional trail crossing the Olympic Peninsula from Port Townsend to the Pacific Ocean. This project will bring the trail through the tribe's administrative campus on the eastern shore of Sequim Bay, linking the Jimmycomelately Estuary segment of the trail in Clallam County with its future continuation to Jefferson County and Port Townsend. The site contains an unobstructed view of Sequim Bay; two tribal kiosks that provide shelter, seating, and traditional tribal carvings; interpretive signs; and restrooms. A newly constructed pedestrian tunnel beneath U.S. Highway 101 provides access to a community transit stop. Pedestrian safety through the heavily traveled area is a primary objective that adds significant costs to the project, but these costs will be shared by the tribe using Bureau of Indian Affairs' funds. Clallam County and the Peninsula Trails Coalition are project partners. (04-1422D-FY06)

**Issaquah Parks & Recreation Department** **\$450,000** **\$950,000** **\$1,400,000**  
**Issaquah-High Point Regional Trail Connector**

Issaquah will use this grant to build a 1-mile, multiple-use trail, filling a missing link in the Interstate-90 cross-state trail and two regional trails--the Issaquah-High Point and East Lake Sammamish regional trails. Known as the Issaquah Gap, this trail segment will serve non-motorized trail users from Seattle, Bellevue, Issaquah, Redmond, and Sammamish and will fill one of the six identified gaps in the Interstate-90 Trail and the Mountains to Sound Greenway Trails System that begins at the Seattle waterfront and follows the freeway across the Cascade Mountains to the Columbia River. This missing link is between the new Sunset Interchange (Exit 18) on Interstate-90 and Gilman Boulevard in Issaquah. The trail's proposed design sets it as a paved trail, a minimum of 10 feet wide with 2-foot-wide graveled shoulders. (04-1101D-FY06)

**Jefferson County Public Works** **\$343,061** **\$393,062** **\$736,123**  
**Larry Scott Memorial Trail Segment 3**

The Larry Scott Trail, when complete, will be an 8-mile section of the regional Olympic Discovery Trail, which extends 54 miles from Port Townsend to the Pacific Ocean. With this grant, Jefferson County will acquire 0.2 miles of right-of-way and develop 3.4 miles of the trail, adding to the 3.2 miles of trail already completed. The trail will be a multipurpose trail paralleled by a 4-foot-wide horse trail. A trail head with generous parking for horse trailers and cars also will be developed. This trail system is a tourist attraction and a resource for residents seeking recreation or alternative modes of transportation. As the backbone of Jefferson County's Non-Motorized Transportation Plan, the trail links local loop trails serving the most densely populated communities of the county, providing access to waterfronts, commercial and employment centers, parks, and lakes. This new segment of trail traverses rural agricultural and wooded terrain in a developing area of the Quimper Peninsula. (04-1317C-FY06)

**Aberdeen Parks & Recreation Department** **\$213,754** **\$218,504** **\$432,258**  
**Chehalis River Walkway**

Beginning in 1978, Aberdeen has been developing projects along the banks of the Chehalis River. This grant will allow the city to connect two of the community's favorite recreational areas, the East Aberdeen Waterfront Walkway, which begins at the east end of Morrison Riverfront Park and concludes at the Chehalis River Bridge and the Bob Basich Trailway, which begins at the bridge and extends to Cosmopolis Lion's Club Park. The city will connect these two trails at the Chehalis River bridge by paving about 3 miles of trail and decking three railroad

bridges out to the Bishop Athletic Complex. Once complete, the Chehalis River Walkway will provide about 10 acres of paved waterfront and neighborhood trails. The walkway will run along the Chehalis River, creating opportunities to view important wildlife and wetland areas, creating a safe path for people to walk to the Bishop Athletic Complex, and providing riverfront access to a low-income neighborhood. Future plans are to connect the Chehalis River Walkway with the trails at the Elk River Nature Preserve. (04-1243D-FY06)

**State Parks** **\$1,348,894**    **\$825,000**    **\$2,173,894**  
**Willapa Hills Trail Phase 2**

The Willapa Hills Trail is a 56-mile stretch of former rail line running from Chelalis to South Bend. State Parks will use this grant to open to the public 10 miles of trail, from Rainbow Falls State Park to the community of Adna. Work will include building the compacted gravel trail and two trail heads, one at Ceres Hill (halfway between Rainbow Falls and Adna) and one at Adna, as well as building a group camp catering to equestrians at Rainbow Falls State Park. The Ceres Hill trail head consists of eight paved parking spaces, a restroom, signs, and a bulletin board. The trail head at Adna consists of 20 paved parking spaces, 10 of which are for larger vehicles, such as recreational vehicles; a restroom; picnic shelter; four picnic tables; equestrian facilities; park signs; and a bulletin board. The group camp at Rainbow Falls will include parking for 20 vehicles with trailers, electrical and water hookups for 20 trailers, restrooms with showers, and equestrian facilities such as water for stock, horse tie-ups, and a paddock at each campsite. (04-1258D-FY06)

**City of Edgewood** **\$654,731**    **\$654,732**    **\$1,309,463**  
**Interurban Trail Extension & Trail Head**

The City of Edgewood will use this grant to begin developing its portion of the Interurban Trail. The project includes the acquisition of the entire Puget Sound Energy right-of-way within the city, development of a portion of trail that begins at Military Road and ends at 114th Avenue East, and development of the 1.11-acre Jovita Crossroads Park as a trail head. The section of trail to be constructed will connect with the City of Milton's segment of the Interurban Trail at the King County line. Edgewood's segment of the Interurban Trail is a key link providing access to other trails, such as the Foothills Trail and Puyallup River Trail. This grant will help the city pave 1 mile of a 12-foot-wide asphalt path; enhance the wetland and habitats adjacent to the trail; and build two wildlife and habitat viewing shelters, three interpretive displays, restrooms, parking, seating, picnic areas, and distinctive trail head signs. Future phases will develop the remaining sections of the trail from 114th Avenue to the West Valley Highway. (04-1403C-FY06)

**Bainbridge Island Park District** **\$75,000**    **\$75,000**    **\$150,000**  
**Cross Island Trail Phase 3**

The Bainbridge Island Park District will use this grant to purchase an easement across 5 acres, filling a missing link and connecting the east and west sides of Bainbridge Island. This trail, known as the Cross Island Trail, has been a vision since the 1980s. This 3.5 miles of trail connects Grant Forest with Battle Point Park and Fairy Dell to the north on Puget Sound. Volunteers from the Bainbridge Island Trails committee will complete the planning and design. (04-1425A-FY06)

**State Parks** **\$1,027,720**    **\$150,000**    **\$1,177,720**

**Columbia Plateau Trail Phase 3 Development**

Columbia Plateau Trail State Park is a 130-mile trail built on a former rail line that connects the Tri-Cities to Spokane. State Parks will use this grant to develop 15 miles of trail from Ice Harbor Dam at Pasco to the Snake River Junction, a historic railroad stop, all along the north shore of the Snake River. Work will include surfacing 15 miles of trail; developing two trail heads at Ice Harbor Dam and the Snake River Junction; building a primitive camp area; and installing interpretive signs for the Lewis & Clark Journey, Ice Age Floods, and historic transportation features as well as for site information, regulations, and safety. In earlier construction phases, State Parks has completed 24 miles of trail, primarily in Spokane County. (04-1199D-FY06)

**Department of Fish & Wildlife** **\$227,976**    **\$30,000**    **\$257,976**  
**Westlake Trail**

The Washington Department of Fish & Wildlife will use this grant to complete 2.5 miles of the Westlake Trail, near the Potholes Reservoir and Moses Lake. Located in arid upland habitat, the trail is relatively flat and offers a panoramic view of about 6 square miles of the Upper Crab Creek Arm of Potholes Reservoir. Work will include paving a section of the trail, building a restroom, and adding viewing blinds, six benches, and educational signs. (04-1197D-FY06)

**City of Mill Creek** **\$150,000**    **\$150,000**    **\$300,000**  
**North Creek Trail—9th Avenue Segment**

When complete, the North Creek Trail will run nearly 8 miles, connecting the communities of Everett, Mill Creek, and Bothell. Mill Creek will use this grant to complete a 2,000-foot gap along 9th Avenue Southeast. Currently trail users along the 9th Avenue section must switch from the trail to an 18-foot-wide road used by cars. The North Creek Trail begins near the Snohomish County Regional Interurban Trail in McCollum Park and passes through the Snohomish County North Creek Park, ending in Bothell at the Sammamish River Trail. Within Mill Creek, the North Creek Trail is more than 3 miles long. (04-1443D-FY06)

**State Parks** **\$852,272**    **\$850,000**    **\$1,702,272**  
**Rocky Reach Trail Development**

The Rocky Reach Trail is an extension of the popular Apple Capital Loop Trail in the Wenatchee area that accommodates hiking, biking, in-line skating, and other non-motorized trail activities. This grant will help develop the Rocky Reach Trail, including construction of 5.1 miles of a 10-foot-wide, asphalt trail along the east shore of the Columbia River from the existing Apple Capital Loop Trail at Odabashian Bridge north to Lincoln Rock State Park. Partners include the Complete-the-Loop Coalition, Washington Department of Transportation, and Chelan County Public Utilities District. (04-1201D-FY06)

**State Parks** **\$264,199**    **\$0**    **\$264,199**  
**Iron Horse—John Wayne Pioneer Trail—Ellensburg Bypass**

State Parks would use this grant to acquire land to complete the 6-mile North Route of the trail, which would reconnect the John Wayne Pioneer Trail. This trail is the major component of the Iron Horse cross-state trail. About 230,000 people used the trail between North Bend and Vantage in 2003. (04-1006A-FY06)

**Department of Fish & Wildlife** **\$172,453**      **\$0**      **\$172,453**  
**Sprague Lake Trail Phase 3**

The Department of Fish and Wildlife will use this grant to complete the final phase of a three-phase project to make wildlife viewing at Sprague Lake more accessible to people with disabilities. Work will include creating a parking space for people with disabilities and then paving the trail from the parking lot to a restroom, to the trail head, and to a wildlife viewing platform and interpretive panels. Sprague Lake's wetlands, which are considered the largest in Lincoln and Adams counties, provide excellent year-round wildlife viewing. They sit between the shrub steppe of the channeled scablands and the dryland wheat farming of the Palouse prairies. (04-1305D-FY06)

**City of Sedro Woolley** **\$100,000**      **\$100,000**      **\$200,000**  
**Sedro-Woolley Regional Trail Connection**

This grant will be used to acquire about 2 acres of Burlington Northern Sante Fe railroad right-of-way for an urban trail inside the city limits of Sedro-Woolley. The trail will connect with Burlington's Highway 20 trail on the west with Skagit County's Cascade Trail on the east. The downtown Sedro-Woolley portion is the only privately held piece of an otherwise 25-mile, multi-use trail that parallels State Highway 20 and extends from downtown Burlington, near Interstate 5, through Sedro-Woolley, Lyman, Hamilton, and rural Skagit County, to the town of Concrete. The trail extension will provide convenient exercise and transportation alternatives to the business community, and safe off-road passage for residents. The City of Sedro-Woolley hopes to preserve this important connection before it is sold off piecemeal and the opportunity is lost to create a contiguous regional trail. (04-1149A-FY06)

Water Access	WWRP Share	Sponsor Share	Total Cost
<b>Total Recommended</b>	<b>\$2,475,000</b>	<b>\$3,515,727</b>	<b>\$5,990,727</b>
<b>Total Alternates</b>	<b>\$2,457,113</b>	<b>\$6,664,723</b>	<b>\$9,121,836</b>

**Port of South Whidbey Island  
Clinton Beach**

**\$576,177                      \$576,178                      \$1,152,355**

Responding to the critical need of this island’s “only town without public access to Puget Sound,” the Port District of South Whidbey Island recently acquired 0.63 acres with 180 feet of sandy, no-bank, waterfront for creation of Clinton Beach park. The port will use this grant to develop the park, which is near the port’s existing fishing pier, dock, and parking. Clinton Beach will feature a sandy beach, a small parking area, restrooms, a small boat dock, viewpoint, picnic areas, information kiosks, landscaping, and interpretive signs. (04-1205C-FY06)

**San Juan County Land Bank  
Fisherman Bay Spit Acquisition and Development**

**\$1,178,000                      \$2,186,127                      \$3,364,127**

The San Juan County Land Bank will use this grant to buy and develop for public use nearly 1 mile of saltwater shoreline, tidelands, and 29.4 upland acres on Lopez Island. The property, known as Fisherman Bay Spit, will give the public access to the beach and water for walking, fishing, kayak landing and picnicking, and will preserve a diversity of shoreline habitats, several recorded archaeological sites, and a magnificent natural landscape. Development will include construction of a parking lot, trails, a restroom, and signs. An existing dingy dock provides potential for small watercraft access and crabbing. The spectacular sand spit at the entrance to Fisherman Bay is a prominent landmark within the renowned San Juan Islands. While the San Juan Islands have nearly 440 miles of saltwater shoreline, less than 5 percent is available for public use. (04-1325C-FY06)

**Spokane County Parks & Recreation  
Newman Lake Acquisition**

**\$500,000                      \$532,527                      \$1,032,527**

More public access to water was identified by residents as a high priority during adoption of the Spokane County Park Plan. This grant will help the county meet this need by helping fund the acquisition of 117 acres, including more than 3,000 feet of shoreline along Newman Lake, the largest lake in Spokane County. The land provides opportunities for launching boats, fishing, swimming, snorkeling, picnicking, observing wildlife, and hiking old logging roads meandering through the property. In addition, the property offers spectacular views from scenic hilly forested areas, to shoreline areas to wetlands. The Newman Lake Property Owners Association, which has been in existence for more than 50 years, has offered to care for the land through patrolling, picking up litter, restoring work, and providing education programs. The Conservation Futures Program will be used to buy an additional 304 acres of wetlands, meadows, and timbered uplands. (04-1058A-FY06)

**City of Tacoma** **\$220,823** **\$220,895** **\$441,718**  
**Chinese Reconciliation Park Phase 1**

The Chinese Garden and Reconciliation Park is a unique, multi-phased, waterfront development project on Commencement Bay in Tacoma. This grant will help the city complete the critical first phase of development, which includes restoring the beach to provide a natural wading area and a natural launch site for nonmotorized boats, including the annual dragon boat races. A shower facility, picnic area, trails, asphalt ramp, and large parking area will complement and provide support for these activities. The 2-mile Ruston Way linear waterfront parks are used heavily year-round by residents and visitors to the region. Long-term plans provide for trails linking downtown Tacoma and Point Defiance with several trails extending through the gulches along Commencement Bay. When completed, this park will blend outdoor recreation opportunities with the historical recognition and reconciliation of the expulsion of the Chinese from Tacoma in 1885. This project was partially funded. The remainder of the project is listed under “Alternates.” (04-1370D-FY06)

Alternates

**City of Tacoma** **\$333,398** **\$333,507** **\$666,905**  
**Chinese Reconciliation Park Phase 1**

This project completes funding for phase 1. See full project description listed above. (04-1370D-FY06)

**Bainbridge Island Park District** **\$141,018** **\$143,856** **\$284,874**  
**Blakely Harbor Project Phase 1**

Blakely Harbor Park is a popular destination for boaters, kayakers, beach enthusiasts, walkers and about 3,000 students annually participating in Puget Sound's regional environmental learning seminars at IslandWood located adjacent to this park. This grant will provide two restrooms, storage, parking, historical and environmental interpretation, trails, and a bridge. This work will connect the two areas of the park. Currently, park visitors must leave the park and re-enter to experience both the uplands and saltwater areas. The site also will be tied to an adjoining cultural site now being purchased. Site development has received endorsement from IslandWood, a non-profit environmental learning center dedicated to elementary students, Washington Water Trails, and the Bainbridge Island Land Trust. (04-1424D-FY06)

**Seattle Parks & Recreation Department** **\$300,000** **\$500,000** **\$800,000**  
**South Lake Union Park Development Phase 1**

Seattle will use this grant to develop 1.2 acres into a major waterfront park, providing the public with access to Lake Union. Work will include improving the loading dock, waterfront walkway, and landscaping. The park is an important phase of the overall South Lake Union Masterplan, an 11-acre regional park that will compliment the Maritime Heritage Center, which preserves and displays boating and the water-related history of the region. The park provides outdoor spaces for large community gatherings as well as waterfront access for workers, visitors, and residents of the South Lake Union Park neighborhood. (04-1208D-FY06)

**Department of Fish & Wildlife** **\$245,715** **\$0** **\$245,715**  
**Tim's Pond Public Access**

The Tim's Pond Public Access project will offer recreational opportunities to wildlife enthusiasts, particularly those with physical disabilities, by improving the parking, loading and unloading areas, restrooms, floating fishing docks, and a perimeter pathway around the popular, trout-stocked fishing lake. The undeveloped site has easy access to U.S. Highway 12 and the Tieton River and is undeveloped. Visitors to Tim's Pond enjoy fishing, picnicking, bird watching, wildlife viewing, and nature observations in a visually stunning outdoor setting. Towering basalt cliffs frame a rushing mountain river along the south shore of Tim's Pond, with a mixed shoreline of oak woodlands, conifers, and native flowering shrubs. (04-1309D-FY06)

**Bellevue Parks & Community Service** **\$1,000,000** **\$5,425,000** **\$6,425,000**  
**Meydenbauer Bay Waterfront Acquisition**

With this grant, Bellevue will be able to buy the two remaining waterfront parcels between Meydenbauer Beach Park and the city-owned marina. Bellevue is bound on the west by Lake Washington and on the east by Lake Sammamish. However, because of urban development, topography, and the almost continuous private ownership of the shoreline, the public has limited visual and physical access to these lakes. Of the more than 11 miles of shoreline along the two lakes, less than 10 percent is in public ownership. Acquisition of the two remaining parcels adds .5 acre and 146 linear feet of waterfront to the city's holdings and substantially completes the Lake Washington acquisition plan envisioned in the mid-1970s. These two properties are critical to the city's long-range vision for this area - a waterfront park that extends from Meydenbauer Beach Park to the marina, and a connection from that park to downtown Bellevue's commercial and residential areas and the Downtown Park. (04-1353A-FY06)

**Bainbridge Island Park District** **\$262,360** **\$262,360** **\$524,720**  
**Rockaway Beach**

Creating a park for divers is the subject of this grant. The grant would allow Bainbridge Island to buy four lots, providing 220 feet of shoreline and more importantly, an area of flat-topped rocks that reach out into mid Puget Sound. This area, called Rockaway Beach, has long been popular among area divers, and would be one of only a few public dive parks on the west sound in Kitsap County. The site is home to four reefs, ranging from 15 feet to 25 feet, and abundant marine life, most notably octopus. There also is a 20-minute kayak paddle from Blakely Rock. The site commands views of Puget Sound, downtown and west Seattle, Mount Rainier, and Blakely Rock. Rockaway's purchase is supported by Friends of Rockaway Beach, The Bainbridge Island Land Trust, Washington Water Trails, Kitsap County, and local diving enthusiasts. (04-1351A-FY06)

**Department of Fish & Wildlife** **\$174,622** **\$0** **\$174,622**  
**Stillaguamish River Public Access**

The north fork of the Stillaguamish is a tremendously popular area for fly-fishing. With this grant, the Washington Department of Fish and Wildlife will be able to contain cars to a designated area and build a hand launching area and restrooms. The 17-acre riverfront site was purchased in 1993 with assistance from the Evergreen Fly Fishing Club for public fishing access. Currently, the only developed river access for more than 30 miles of river is in Arlington, 5 miles downriver from this site. Drift boats are restricted to this site for launching and takeout. Typically, drift boaters hand launch a boat without a motor and float down the river 2 miles to 10

miles in a day. This remote and undeveloped site also has been used extensively for swimming, picnicking, and canoeing. (04-1310D-FY06)

<b>Department of Fish &amp; Wildlife Tieton River Canyon Phase 2</b>	<b>\$2,806,650</b>	<b>\$0</b>	<b>\$2,806,650</b>
--	--------------------	------------	--------------------

The Department of Fish and Wildlife will use this grant to purchase 3,200 acres of imperiled ponderosa pine forests and other diverse habitats on the east slope of the Cascade Mountains in Yakima County. This is phase two of a larger project that covers an entire township, 36 square miles, of checkerboard ownership within the Wenatchee National Forest, adjacent to the Oak Creek Wildlife Area. Critical habitat exists here for ponderosa pine dependent species, such as white-headed woodpecker and flammulated owl. Other habitats and species present include: Oregon White Oak, with Lewis' woodpecker and habitat for the extirpated western gray squirrel; mixed conifer forests home to goshawks, spotted owls, and pileated woodpeckers; basalt cliffs with nesting golden eagles; dense riparian with neotropical migrants; streams, particularly Oak Creek, with federally-listed steelhead and bull trout; and shrub-steppe with bighorn sheep, wintering mule deer, elk, and bald eagles. The Tieton Canyon area is popular for hiking, bird watching, fishing, hunting, antler and mushroom gathering, camping, and rafting. Highway 12 follows the Tieton Canyon in a spectacular corridor where basalt formations framed by tall trees tower above the river. Partners working on this project include The Nature Conservancy, the Rocky Mountain Elk Foundation, the Cascades Conservation Partnership, local conservation and recreation groups, and the Yakima County Commission. (04-1284A-FY06)

<b>Department of Fish &amp; Wildlife Reardan's Audubon Lake</b>	<b>\$555,721</b>	<b>\$0</b>	<b>\$555,721</b>
---	------------------	------------	------------------

Reardan's Audubon Lake in Lincoln County is 277 acres of wetlands, ponds, grasslands, and channeled scablands supporting more than 200 species of birds and other wildlife, mostly in spring and fall migrations. The site includes 13 species and 4 bird communities of special concern status and 5 habitat types or elements of special concern for the Department of Fish and Wildlife. It is the headwaters of Crab Creek, a Columbia River tributary, and Deep Creek, a Spokane River tributary. It is an Audubon Important Bird Area nominee. Listed in many birding guides, the site is planned for inclusion in the Northeast Washington Birding Trail. The grant would be used to purchase and develop this unique ecosystem and wildlife-viewing site. The property, just outside the town of Reardan in Lincoln County (22 miles to Spokane), was on the market for housing subdivision development until the Inland Northwest Land Trust and Spokane Audubon Society secured an option to purchase by spring 2006. The Trust and Audubon, along with Ducks Unlimited, Reardan, and the Reardan Chamber of Commerce, are committed to cooperatively preserving and developing this site. This project helps develop wildlife viewing sites near small rural communities that can reap the economic benefits of new visitors. (04-1285C-FY06)

---

Alternates

**Department of Fish & Wildlife** **\$1,938,256** **\$0** **\$1,938,256**  
**Methow Watershed Phase 4**

This completes funding for phase 4. See full project description listed above. (04-1286A-FY06)

**Department of Fish & Wildlife** **\$2,267,685** **\$0** **\$2,267,685**  
**Cowiche Watershed Phase 2**

The Cowiche Watershed Phase 2 project in Yakima County seeks to protect 4,640 acres of critical and diverse habitats on the east slopes of the Cascade Mountains near Yakima, while expanding connectivity among existing public lands. Priority habitats on the project include stream, riparian, wetland, shrub-steppe, oak woodland, aspen, cliffs, and talus. The property provides critical habitat for numerous listed and priority species, including: federally-listed steelhead and bull trout, west-slope cutthroat trout, golden eagle, loggerhead shrike, sage thrasher, sage sparrow, white-headed woodpecker, Lewis' woodpecker, elk, mule deer, and bighorn sheep. The department has partnered with the Cowiche Canyon Conservancy (a local land trust) and the Rocky Mountain Elk Foundation. The current landowner needs to sell the property to meet his financial obligations, which puts this land in imminent risk of subdivision and development. (04-1287A-FY06)

**Department of Fish & Wildlife** **\$4,638,742** **\$0** **\$4,638,742**  
**Skookumchuck Watershed Phase 1**

The Department of Fish and Wildlife will use this grant to buy 10,000 acres of high quality shrub steppe, encompassing virtually the entire Skookumchuck watershed, a tributary of the Columbia River north of Vantage in Kittitas County. The Skookumchuck watershed project is a unique opportunity to protect a large tract of shrub-steppe habitat and link the largest remaining blocks of shrub-steppe in the state. This is the first phase in a two-phase acquisition proposal. In addition to protecting shrub-steppe, this acquisition would establish landscape-scale connectivity between two existing wildlife areas that abut the property to the north and to the south. The Skookumchuck provides critical habitat for numerous federal, state, and priority listed species, including endangered Upper Columbia River steelhead, state-listed sage grouse, and bighorn sheep. This key piece of property supports the majority of the shrub-steppe-dependent species endemic to Washington. It has been identified as a target for conservation in the Columbia Plateau Eco-regional Assessment and designated as an Important Bird Area in Washington by Audubon. Sixty percent of the shrub-steppe in Washington already has been lost. (04-1283A-FY06)

**Department of Fish & Wildlife** **\$753,245** **\$752,245** **\$1,505,490**  
**Upper Yakima River Floodplain**

This grant aims to protect 2 river miles of shoreline habitat and about 160 acres of broad floodplain along the upper Yakima River. This complex of waterways are exceptionally important for summer steelhead and spring Chinook during their early life. A substantial portion of the spring Chinook run spawns in this nearly pristine reach. The land includes intact, complex riparian habitat, several side channels, a broad floodplain, and the Tucker Creek confluence. Recreational and natural resource benefits include blue-ribbon fishing, rafting, and bird watching. Located just 70 miles from downtown Seattle, this property needs protection to survive development pressures. Although most of the floodplain is privately owned, this project

adjoins 175 acres of land owned by the Department of Natural Resources and Bonneville Power Administration mitigation land to the west. A half mile downstream is an additional 500 acres of federal land, which makes protection of this property a key connection for these habitats. (04-1428A-FY06)

**Department of Fish & Wildlife** **\$673,365** **\$0** **\$673,365**  
**Western Gray Squirrel**

Acquisition of 335 acres, adjacent to the Department of Fish and Wildlife’s Klickitat Wildlife Area, is needed to protect the 135 nests of western gray squirrels, which are threatened with extinction. The Klickitat County land has the ideal mix of habitat for western gray squirrels: a mixed conifer forest with an Oregon white oak component, sufficient canopy cover, and accessibility to water. Due to careful forest management by the long-time private owner, the property has a sparse, grass-covered understory, which also is favored by the western gray squirrel. Mature Oregon white oak woodlands are used by an abundance of mammals, birds, reptiles, and amphibians and are considered the most important wildlife tree because of their acorns and multiple cavities. The oaks play a critical role in the conservation of neo-tropical migrant birds and host unusually high breeding densities of the Nashville warbler. The mature ponderosa pine habitat that covers much of the site is typical habitat for one of the rarest birds in the state: the white-headed woodpecker. This site is home to several other priority species, including blacktail deer, wild turkey, Lewis' woodpecker, pileated woodpecker, and rainbow trout. The acreage also includes 1/8 mile of Bowman Creek, home to steelhead trout, which are threatened with extinction, and coho salmon. (04-1275A-FY06)

**Department of Fish & Wildlife** **\$754,200** **\$0** **\$754,200**  
**Asotin Creek 2004**

The Department of Fish and Wildlife will use this grant to buy 1,300 acres in the steep canyons of Asotin County, a key area for providing quality habitat for shrub-steppe-dependent wildlife, endangered anadromous fish, and native fish. The property is in the Charley Creek drainage and adjoins other blocks of public land: Washington Department of Fish and Wildlife's Asotin Creek Wildlife Area, the Umatilla National Forest, and Department of Natural Resources lands. As a link in a vital watershed for salmon recovery, the parcels hold high conservation values. Endangered Species Act listed stocks of summer steelhead, spring Chinook, and bull trout, along with native redband and resident rainbow trout use the Asotin Creek watershed. With this acquisition, virtually all of Charley Creek will be under state and federal ownership, allowing this tributary of Asotin Creek to be managed as an entire watershed. The land also contains habitat for elk and is important for the department’s goal to increase the Asotin elk herd from 700 to 1,000 animals. Mule deer, chukar partridge, songbirds, and bighorn sheep use the property, too. Native plant species dominate the landscape, including bluebunch wheatgrass, Idaho fescue, lupine, and arrowleaf balsamroot. (04-1290A-FY06)

recognized as national priorities for protection. This grant is critical to preserving these lands, which are threatened with development. (04-1328A-FY06)

**Department of Fish & Wildlife** **\$875,096** **\$0** **\$875,096**  
**Lummi Island Natural Area Phase 1**

The Department of Fish and Wildlife, with this grant, seeks to purchase 80 acres of the Lummi Island Natural Area Preserve. This two-phase project would leverage more than \$2 million in private funds and create one of the largest contiguous protected areas in the San Juan islands. The land, on the west side of Lummi Mountain on Lummi Island, contains seven department priority habitats (mature Douglas fir forest, snag-rich areas, cliffs, caves, talus, wetlands, and vegetated marine shoreline), nesting habitat for several species of concern, and the best example of the Douglas-fir/baldhip rose-oceanspray native plant community in the Puget Trough. In the first phase of the project, the department will purchase from willing landowners 80 acres that are likely to be logged within the next two years if protection is not secured. In the second phase, the department will seek to preserve an additional 235 acres, completing protection of the Lummi Island Natural Area Preserve. The department will ensure long-term protection of the preserve through cooperative agreements with Lummi Island Heritage Trust, a local land conservancy. The trust is broadly supported by the local community, would monitor access at no cost, and would facilitate research and educational opportunities. (04-1291A-FY06)

**Department of Natural Resources** **\$878,325** **\$0** **\$878,325**  
**Methow Rapids Natural Area Preserve**

Recent inventories have documented that more than half of the state's shrub-steppe habitat has been lost and that much of the remaining shrub-steppe has been degraded. Methow Rapids Natural Area Preserve, located along the Columbia River in southwestern Okanogan County, supports outstanding examples of two shrub-steppe communities that are among the least-protected and most limited in extent within the state: Smooth sumac/bluebunch wheatgrass and antelope bitterbrush/bluebunch wheatgrass. Historically, these communities were most extensive in the Okanogan Valley and along portions of the Snake and Columbia rivers. Intact examples of these communities are now very limited due to overgrazing, as well as expanding agricultural and residential development. The department will use this grant to expand the existing natural area preserve by 301 acres to include additional areas of these plant communities. This will add significantly to the statewide protection of these communities, enhance the long-term viability of the site, and provide a protected habitat connection to the Columbia River. (04-1327A-FY06)

**Department of Natural Resources** **\$543,690** **\$0** **\$543,690**  
**Dyer Haystacks and Two Steppe Natural Area Preserves**

This project seeks to protect 3,110 acres of good examples of eastern Washington's original bunchgrass grassland at two sites in Douglas County: Dyer Haystacks and Two Steppe natural area preserves. Big sagebrush and three-tip sagebrush appear in these grasslands with a diversity of native wildflowers and grasses, most predominantly bluebunch wheatgrass (the state grass). These sites include representatives of the unique geology of Washington. Dyer Haystacks is a jumble of glacial erratic boulders and Two Steppe includes a cliff along Moses Coulee. Lands proposed for acquisition provide habitat for state sensitive plant species and federal and state listed species: sharptail grouse and sage grouse (federal species of concern and state threatened with extinction); and sage sparrow, sage thrasher, and golden eagle (state candidate species). This project is coordinated with the state Department of Fish and Wildlife's efforts to restore

habitat for the listed species in Douglas County, and will provide native habitat and a baseline for restoration and management monitoring. Two Steppe is a phase two acquisition that will add to the natural area's core area. The Nature Conservancy is a partner in this project. (04-1329A-FY06)

**Department of Natural Resources** **\$576,027** **\$0** **\$576,027**  
**Kennedy Creek Natural Area Preserve**

The Department of Natural Resources will use this grant to buy about 45 acres of three high quality intertidal salt marsh ecosystems for inclusion in the Kennedy Creek Natural Area Preserve. The land includes the remaining, privately owned, salt marsh vegetation in the Kennedy Creek estuary, riparian and tidally influenced portions of Schneider Creek, and an upland forest. High quality estuaries with saltmarsh vegetation dominated by native species are now relatively rare in the Puget Trough ecoregion. This estuary provides critical resting, feeding, and wintering habitat for migrating and resident shorebirds and waterfowl including dunlin, greater yellowlegs, black-bellied plovers, and sandpipers. The land also supports a healthy population of native salmon, bald eagles and marbled murrelets (both listed as threatened with extinction by the federal government), and peregrine falcon (listed by the federal government as a species of concern). This project was partially funded. The remainder of the project is listed under "Alternates." (04-1326A-FY06)

## Alternates

**Department of Natural Resources** **\$88,780** **\$0** **\$88,780**  
**Kennedy Creek Natural Area Preserve**

This project completes funding requested for the preserve. See full project description listed above. (04-1326A-FY06)

**Department of Natural Resources** **\$1,307,460** **\$0** **\$1,307,460**  
**Ink Blot and Shumocher Creek Natural Area Preserves**

The Department of Natural Resources proposes to buy, manage, and protect wetlands and adjacent uplands within two state natural area preserves: Ink Blot and Shumocher Creek. Both preserves are in Mason County near Hood Canal and the Skokomish Valley. These preserves contain three imperiled wetland and bog ecosystems and seven very rare or high quality wetland plant communities. One of the plant communities found in the Shumocher Creek Preserve, the Sitka alder/skunk cabbage - water parsley community, has a very restricted geographic range; it is only found in the Puget Trough ecoregion and is critically imperiled globally. The grant will help buy 177.5 acres from willing sellers at both sites. (04-1416A-FY06)

**Department of Natural Resources** **\$246,330** **\$0** **\$246,330**  
**Carlisle Bog Natural Area Preserve**

Eighty acres will be purchased with grant for inclusion in the Carlisle Bog Natural Area Preserve in Grays Harbor County. The overall wetland system at Carlisle Bog is very large and diverse. The preserve contains high quality examples of a freshwater wetland, sphagnum bog, permanent ponds, two globally imperiled wetland plant communities, and high quality representatives of six additional wetland plant communities. In addition, the land contains one state sensitive plant and animal species. The wetlands are connected to other wetlands already managed by the

department and are critical to maintaining the land's hydrology and water quality. Consequently, this proposed acquisition would significantly upgrade the integrity of the preserve. In addition, protecting the wetland at Carlisle Bog is important because similar wetlands have been lost or degraded. This acquisition will complete the preserve as adopted by the Natural Heritage Advisory Council. (04-1378A-FY06)

**Department of Natural Resources** **\$1,085,490** **\$0** **\$1,085,490**  
**Selah Cliffs Natural Area Preserve**

This project in Yakima County is part of a continued effort to acquire lands within the Selah Cliffs Natural Area Preserve, which provides protection for one of the largest populations of the basalt daisy, a candidate for listing under the federal Endangered Species Act. The basalt daisy's global distribution is limited to the southern half of the Yakima River Canyon and the adjacent Selah Creek Canyon. The existing natural area preserve encompasses more than 75 percent of this population. This grant will allow the department to purchase 289 acres and add to the proportion of the population that is protected. It will improve the department's access to the site and ability to manage the land for its ecological values. The remaining portion of the basalt daisy population is on the adjacent Yakima Training Center, managed by the U.S. Department of Defense. The cliffs within the project area are identified as a priority habitat by the Department of Fish and Wildlife and are known to be used by prairie falcons and golden eagles. (04-1376A-FY06)

**Department of Natural Resources** **\$3,111,465** **\$0** **\$3,111,465**  
**Cypress Island Natural Area**

The Department of Natural Resources will use this grant to buy 97 acres of waterfront property on Cypress Island in Skagit County. Cypress Island Natural Area Preserve/Natural Resource Conservation Area is a unique natural area due to its large size, ecological diversity, and level of existing protection. Cypress Island has no infrastructure or ferry service, and limited development, all which help increase protection. Nearly 91 percent of the island is owned and managed by the department. This grant will help the department acquire selected remaining lands. The land is threatened with conversion to other uses because of rising property values in the San Juan Islands and the attractiveness of the island for vacation homes and resorts. (04-1330A-FY06)

**Department of Fish & Wildlife** **\$2,074,800** **\$0** **\$2,074,800**  
**Icy Creek**

This grant will protect the headwaters of Icy Creek, a major source of year-round, cold, clean water for the Green River, which is one of the most important rivers in Puget Sound for salmon recovery. Icy Creek is a spawning area for steelhead, cutthroat trout, and several species of salmon - Chinook, chum, pink and coho. The creek also serves as an important refuge for fish during floods. The department will use this grant to buy 192 acres of adjacent uplands, protecting the quality of Icy Creek's waters. These uplands provide a mix of forest ages and homes for wildlife including deer, cougar, elk, bear, mink, weasel, raptors, songbirds, and amphibians. Mature trees with cavities and snags provide foraging and nesting habitat for the pileated woodpecker, a state species of concern. The land also connects critical habitat in blocks of public land in the Green River Gorge Mountains to Valley Greenway, which extends from the Cascade foothills to the Green River Valley. King County has identified Icy Creek as a top priority for preservation in the watershed. This project has broad-based local and regional support. (04-1365A-FY06)

**Department of Natural Resources** **\$1,830,885** **\$0** **\$1,830,885**  
**West Tiger Mountain Natural Resources Conservation Area**

The Department of Natural Resources will use this grant to buy nearly 68 acres of the last remaining parcels identified as a high priority for the West Tiger Mountain Natural Resources Conservation Area in King County. The department will manage the land to protect significant urban wildlife habitat; provide opportunities for low-impact public use and outdoor environmental education; and provide vital open space, landscape connections, and scenic vistas in the Mountains to Sound Greenway. The conservation area contains talus caves, two low-elevation lakes, three stream systems, forested wetlands, and old growth Douglas fir forests. It has immense regional and local importance. On the lower slopes of Tiger Mountain, high priority parcels are in the lower reaches of the Many Creek Valley drainage along a tributary to Issaquah Creek and in high visibility scenic portions of the Mountains to Sound Greenway. This project reduces fragmentation of an important landscape and ecosystem threatened by residential development. (04-1349A-FY06)

**Department of Fish & Wildlife** **\$2,855,370** **\$0** **\$2,855,370**  
**Vancouver Lowlands Phase 2**

This grant will help the department acquire the last, large, un-diked blocks of land in the Vancouver lowlands along the Columbia River. The three target properties will add to the protected habitats of the department's 2,200-acre Shillapoo Wildlife Area and the Ridgefield National Wildlife Refuge, which jointly form an important conservation area. The first property, 450 acres, includes most of Green Lake and all of Curtis Lake. The second parcel, 300 acres, includes the remaining unprotected portion of Mulligan Slough. The third parcel, 120 acres, includes the southern end of Round Lake and 3,500 feet of Columbia River shoreline. Together, these properties comprise most of the remaining unprotected lands within the Vancouver lowlands. The primary wildlife communities using these lands are water- or wetland-related species. This is within the core habitat use area for sandhill cranes and is within the only stopover for migrating Canadian bird species. Canada geese, and in particular the dusky subspecies, use upland areas for winter forage. Furbearers are numerous here. The off-channel floodplain wetlands are of rare quality and provide important rearing habitat for salmon and steelhead. In addition, salmon habitat improvements would be possible with this acquisitions

because most of the land is outside the influence of flood control dikes. There are few other known sites of similar nature that remain outside public protection. (04-1293A-FY06)

**Bainbridge Island Park District** **\$1,000,000** **\$2,972,500** **\$3,972,500**  
**Gazzam Phase 2**

Bainbridge Island Park District will use this grant to buy 113 acres, expanding Gazzam to 431 acres. This purchase will provide the public with access to Port Orchard Bay and increase the protection of the wildlife corridor and wetlands. The land contains forests dominated by Douglas fir, western red cedar, western hemlock, red alder, and big-leaf maple. The land protects priority species such as purple martin, bald eagle, pileated woodpecker, and numerous song birds and migrant birds. The area is home to Chinook, chum, and pink salmon, steelhead, cutthroat trout, sandlance, and surf smelt. This project is supported by the Suquamish Tribe, The Bainbridge Island Land Trust, Trout Unlimited, the Kitsap County Audubon Society, and Washington Department of Fish and Wildlife. (04-1418A-FY06)

**Department of Fish & Wildlife** **\$606,690** **\$0** **\$606,690**  
**Lake Terrell Wildlife Area Inholding**

The Lake Terrell Wildlife Area, 10 miles northwest of Bellingham, is a 1,500-acre refuge established in 1948 to protect critical waterfowl habitat along the Pacific Flyway. The centerpiece of the refuge is a pristine 500-acre shallow lake that supports bass, trout, channel catfish, yellow perch, and bluegill and draws an estimated 35,000 anglers and other recreationists each year. For 60 years, Lake Terrell has been a rare respite from city life. The Department of Fish and Wildlife has been able to secure all but one of the lakebed parcels in order to keep the lake and its surrounding habitat pristine. The sole private lakebed parcel and its adjacent uplands have been managed until now in a manner compatible with the refuge. However, when the long-time owner sells the parcel, development is imminent. Without that parcel, the department cannot protect the pristine quality of the lake and the surrounding habitat. The department will use this grant to purchase the last lakebed parcel of 40 acres. (04-1292A-FY06)
