

STATE OF WASHINGTON

OFFICE OF THE INTERAGENCY COMMITTEE
1111 Washington Street SE
PO Box 40917
Olympia, WA 98504-0917

May 22, 2006

TO: SRFB Members & Designees
FROM: Laura E. Johnson, Director 
PREPARED BY: Bruce Crawford, Associate Director, MMT Division 
SUBJECT: 2007-2011 Draft Strategic Plan Final Review

The Strategic Plan incorporates the goals, strategies, and separate plans of the SRFB, IAC, and the needs of the Governor's Forum on Monitoring and the Biodiversity Council as well. Many of the metrics in this plan are new and are based upon GMAP principles. Strategies of potential interest to the SRFB include the following:

- 9.1: Provide grants to restore impaired salmonid habitat using state funds and the federal Pacific Coastal Salmon Recovery Fund.
- 9.2: Provide grants to remove fish passage barriers on small private forestlands using Family Forest Fish Passage Program funds.
- 9.4: Provide grants to acquire and protect important salmonid habitat using state dedicated funds.
- 11.1: Determine whether restoration and protection projects funded by the SRFB are effective in restoring habitat and which types of projects are most cost-effective.
- 11.2: Determine whether SRFB habitat restoration and protection projects are effective in creating more salmon in watersheds by intensively monitoring selected watersheds.

Staff will provide a brief overview of the plan and its impact upon the Board.

The Director must submit the strategic plan to OFM by July 1, 2006 as part of the budget process for the 2007-09 agency budget requests. Please provide your written comments and input by June 19, 2006 to Bruce Crawford at brucec@iac.wa.gov or contact him at 360-902-2956.
