Applicant’s To-Do List

Washington Wildlife and Recreation Program
Riparian Protection Category

This to-do list is designed to help an applicant prepare and submit a grant application for the Washington Wildlife and Recreation Program’s (WWRP) Riparian Protection Category.

Grants may be used to acquire and restore riparian habitat adjacent to any water body or its submerged lands.

An applicant must submit the required information through PRISM Online, the online project data system used by the Recreation and Conservation Office (RCO). These steps will guide an applicant through RCO’s application process.

NOTE: for all documents, forms, and manuals referenced here, go to the grant Web page and grant manuals Web page.

Step 1: Establish Eligibility

Eligible Applicants: Cities, counties, towns; federally recognized Native American tribes; lead entities; nonprofit nature conservancy organizations; state agencies, including the Washington State Conservation Commission; and special purpose districts, port districts, or other political subdivisions of the state providing services to less than the entire state if legally authorized to acquire and develop public open space, habitat, farmland, riparian habitat, or recreation facilities.

A first-time applicant must submit a legal opinion to establish eligibility.

A nonprofit applicant must verify eligibility by meeting all the following criteria:

- Be registered in the State of Washington as a nonprofit as defined by Revised Code of Washington 84.34.250. Verify “active” status with Washington’s Secretary of State at www.sos.wa.gov/corps/.

- Consistent with Revised Codes of Washington 24.03.220, 24.03.225, and 24.03.230, identify a successor organization fully qualified to ensure management continuity of any WWRP grants received by the corporation or association.

- Demonstrate at least 3 years of actively managing projects relevant to the types of projects eligible for funding in this WWRP category. “Actively managing projects” means
performing the tasks necessary to manage an on-the-ground riparian project, such as negotiating for acquisition of property rights, closing on an acquisition, developing and implementing management plans, designing and implementing projects, securing and managing the necessary funds regardless of fund source, and other tasks.

- A nonprofit applicant must provide a copy of its Articles of Incorporation and bylaws. Please e-mail these documents directly to the RCO grants manager.

- Make sure the applicant’s current comprehensive habitat conservation plan is on file with RCO. **The plan is due March 1, 2022.** For RCO purposes, a plan is good for 6 years, so a plan establishing eligibility already may be on file. See Manual 2: Planning Policies and Guidelines and RCO Planning Requirements.

- ALL projects **must** include acquisition of real property.

### Step 2: Review Materials

- Review the appropriate Recreation and Conservation Funding Board manuals for this grant category:
  - **Manual 10b: Washington Wildlife and Recreation Program, Habitat Conservation Account**
  - **Manual 2: Planning Policies and Guidelines**
  - **Manual 3: Acquisition Projects**
  - **Manual 4: Development Projects**
  - **Manual 5: Restoration Projects**

An applicant required to plan under the Growth Management Act\(^1\) should consult the applicant’s planning department or contact the Washington State Department of Commerce’s Growth Management Services to determine compliance status with the Growth Management Act. RCO uses information reported by the Department of Commerce in evaluation scoring. An applicant in compliance receives a zero score on the question; an applicant out of compliance receives a minus one score. If the applicant’s organization is out of compliance, this advance inquiry may give the applicant time to change the status before the technical completion deadline.

\(^1\)Revised Code of Washington 36.70A
SecureAccess Washington Account

Before beginning an application, an applicant must sign up for a SecureAccess Washington account and submit a PRISM New User Account Form. When using either of these databases for the first time, an applicant must complete a double sign-in.

PRISM Online Application

PRISM will open in February. To start an application, go to PRISM Online and select “+ New Application.” Follow the prompts to fill out the application. On-screen instructions, tool tips, and links are available throughout the Application Wizard.

PRISM Attachments

There is an Attachments screen for each PRISM Online application. Attach the documents below before submitting an application. Include the applicant name, project name, and RCO grant number on each attachment. Maps must include a north arrow, scale, and labels for any major highways, roads, cities, water bodies, etc. If the project includes any combination of acquisition, development, or restoration, attach the documents required for all project types.

- **Authorizing Resolution/Application Authorization** (due by the technical completion deadline) shows the application is supported by the elected council or commission, board, or executives of the applicant’s organization. Applicant must adopt the text verbatim even if they choose to use their own format.
  
  - Puget Sound Partnership Action Agenda Certification. An applicant for a project in the Puget Sound area, which is defined as the geographic areas within Water Resource Inventory Areas 1 through 19, inclusive, must include in the adopted resolution or application authorization a statement certifying that the project is not in conflict with the Puget Sound Partnership Action Agenda. There is certification language in the resolution/authorization template on RCO’s Web site.

- **Environmental Benefits Statement.** Provide a statement on the environmental benefits of the project.
  
  - The statement must not exceed one, single-sided page.
  
  - It should be typed, using single-spacing, on white, 8½- x 11-inch paper, with 1-inch margins.
  
  - Use a regular typeface, such as Arial or Times Roman, 12-point size.
Include the applicant name, project name and number, and the date written.

- **Landowner Acknowledgement Form.** An applicant must demonstrate that the landowner is aware of the applicant’s interest in purchasing the property. There are several options to meet this requirement (see Section 3: Application Requirements in Manual 3: Acquisition Projects).

- **Local Jurisdiction Review and Conferral.** An applicant must review the proposed project application and confer with the county or city with jurisdiction over the project area. Attach documentation demonstrating that this process has begun (see Section 3: Application Requirements in Manual 3: Acquisition Projects). A sample letter is available in the Acquisition Project Tool Kit on RCO’s Web site. If acquiring property within the applicant’s own jurisdiction, the authorizing resolution meets this requirement.

- **Map: Boundary Map–Draft** (development and restoration projects only) shows the extent of the site covered by the grant agreement. The map is used by RCO and the sponsor to ensure compliance with provisions in the grant agreement. Factors to consider when establishing boundary maps include project scope, a complete recreation or public access experience, site management unit or area, and past RCO grant assistance at the site. See Manual 4: Development Projects for additional details and boundary map requirements.

- **Map: Parcel Map** shows the parcels to be acquired in the scope of work as well as adjacent land ownership. Show the parcels in relation to local roads, landmarks, etc. Include the county parcel numbers on the map.

- **Photograph.** Every application requires at least one general project photograph in .jpg format. A current ground shot or aerial view of the project site is appropriate.

- **Site Plan: Development Site Plan** (for combination acquisition and restoration projects only) shows the proposed improvements at the project site. This plan should show site boundaries, major site features, and proposed project elements. Existing and future elements should be distinguished from those in the current project. Master, schematic design, design development, and construction document level plans are suitable for a development site plan.

- **Site Plan: Restoration Site Plan** (for combination acquisitions and restoration projects only) shows the restoration activities to take place on the project site. Existing and future restored areas should be distinguished from those in the proposed project scope.

- **Control and Tenure Documentation** (for combination acquisition and development or restoration projects) only if proposing any of the development or restoration work on properties the applicant already owns or has control over. Documentation will include property ownership information, such as a deed, and all applicable leases, easements,

For multi-site acquisition projects only:

- Map: Multi-Site Acquisition. Identify all parcels being considered for acquisition. Proposed parcels should be contiguous with one another or contiguous with property currently protected through public or nonprofit ownership. Parcels may be non-contiguous if an applicant can demonstrate in the acquisition strategy that acquiring land anywhere within the geographic envelope will achieve the goals of the project. Show the parcels in relation to political subdivisions, roads, landmarks, other protected property, etc.

OR

- Map: Geographic Envelope. If identifying specific parcels would create a hardship for targeted landowners or would jeopardize potential acquisitions, an applicant instead may identify a geographic envelope containing all parcels under consideration. Proposed parcels should be contiguous with one another or contiguous with property currently protected through public or nonprofit ownership. Parcels may be non-contiguous if an applicant can demonstrate in the acquisition strategy that acquiring land anywhere within the geographic envelope will achieve the goals of the project. Show the geographic envelope in relation to political subdivisions, roads, landmarks, other protected property, etc.

Note that letters and other documented expressions of project support or concern submitted with the application will be made available for advisory committee review. An applicant should also summarize this in the presentations for technical review and evaluation. All letters must be combined into one PDF and attached to the project in PRISM.

Also note that except for a few protected items, such as cultural resources data or confidential appraisal documents, as soon as the application is started in PRISM, it and most attachments will be available for review by RCO staff, evaluators, and the public.

An applicant may present the project to the advisory committee. Participation in this technical review is not required but is highly recommended. It serves as a practice session for the upcoming evaluation and provides valuable feedback. The focus of review is on eligibility and the technical aspects (scope, design, cost, feasibility, etc.) of projects.

- Prepare a PowerPoint presentation responding to the evaluation criteria in Manual 10b. Handouts and other materials will not be permitted. See Tips for Developing a PowerPoint Presentation for Grant Applicants for more information. RCO will schedule a time for the presentation to the evaluation team.
- Attach the PowerPoint presentation to PRISM Online at least 3 business days before the scheduled review meeting.

- Present the project to the advisory committee virtually. Technical review sessions are 30 minutes. An applicant will have up to 20 minutes to present a project. The remaining 10 minutes are reserved for questions by the advisory committee.

Committee members provide feedback and make suggestions about changes needed to improve the project and presentation.

RCO staff also will review the application for eligibility, completeness, and clarity, and will return the application with questions or suggested changes.

**Step 5: Re-Submit Application by Technical Completion Deadline–July 13, 2022**

- Address issues raised during technical review and make modifications, if needed.

- **Authorizing Resolution/Application Authorization** shows the application is supported by the elected council or commission, board, or executives of the applicant’s organization. An applicant must adopt the text verbatim even if using a different format.

- **Local Jurisdiction Review and Conferral.** Attach documentation demonstrating that completion of this process (see Section 3: Application Requirements in Manual 3: Acquisition Projects). A sample form is available in the Acquisition Project Tool Kit on RCO’s Web site. If acquiring property within the applicant’s own jurisdiction, an authorizing resolution meets this requirement.

- Complete all revisions and resubmit the application in PRISM Online by the technical completion deadline or the application will be deemed ineligible.

**Step 6: Present Project for Evaluation–August 17-18, 2022**

Participation in the project evaluation meeting is mandatory for all projects considered for funding. All presentations are given virtually.

- Prepare (or update from technical review) a PowerPoint presentation responding to the evaluation criteria found in Manual 10b. Respond to the criteria in order. Handouts and other materials will not be permitted. RCO will schedule a time to make a presentation to the evaluation team.

- Attach the PowerPoint presentation and presentation notes to the application in PRISM Online at least 3 business days before the scheduled evaluation.
Present the project to the evaluation team. Evaluation sessions are 30 minutes. Each applicant will have up to 20 minutes to present a project. The remaining 10 minutes are reserved for questions and deliberation by the advisory committee.

Evaluators may ask clarifying questions and will score projects using the board-adopted evaluation criteria.

RCO staff tabulate the results and share the preliminary ranked list with the advisory committee to validate the results, establish the committee’s funding recommendation, and discuss any proposed process or policy changes. RCO then announces the results of the evaluation and posts the preliminary ranked list on its Web Site.

RCO staff present the preliminary ranked list to the Recreation and Conservation Funding Board for final approval and inclusion with the board’s recommendation to the Governor and the Legislature.

**Step 7: Submit Pre-Agreement Materials–May 1, 2023**

- Provide a **Certification of Applicant Match** to show what amounts and sources of match are in hand for the project. Attach it to the application in PRISM Online at least 1 calendar month before the board funding meeting, per Washington Administrative Code 286.

- If a **combination project**, an applicant must secure the property at least 1 month before the board considers approving funding (see *Manual 3*).

- Provide any other requested pre-agreement materials as required by RCO.

**Step 8: Sign Grant Agreement–After July 1, 2023**

The Recreation and Conservation Funding Board approves grant funding after the Legislature adopts a budget. RCO works with each applicant to execute a grant agreement before work begins.

- Applicant reviews other RCO policy manuals:
  
  - *Manual 7: Long-Term Obligations*
  
  - *Manual 8: Reimbursements*

- Applicant reviews the Successful Applicant Workshop materials, then completes the project.
