STATE LANDS INVENTORY

OWNERSHIP, CONTROL AND USE SUMMARY

1970

WASHINGTON STATE LIBRARY
STATE DEPOSITORY COPY

INTRODUCTION

In accordance with Chapter 53, Laws of 1969, a reporting system has been developed to provide information on a county level relative to land uses on state-owned or managed lands. This document provides a statistical summary of data obtained from this system.

Forty-seven specific types of land uses are identified in this summary. They are based on land designations presently used in inventory records of state agencies, on terminology commonly used and understood by the general public, and on deliberations by a committee composed of representatives of nine state agencies, including those who collectively own or manage over 95% of all state lands.

Forms developed by the State Lands Inventory Committee were sent to 88 state agencies. Of these, 63 indicated they did not own or manage any state lands. The remaining 25 agencies are responsible for the 3,817,480 acres and 12,747 miles of state lands reported in this document. These totals reflect state inventory records as of July 1, 1970.

The Department of Highways inventory system is in the process of revision, therefore only partial acreage totals were available for Lincoln, Spokane, Stevens, Thurston and Whitman Counties. Mileage figures are complete for all counties.

Capital improvements on the lands are not included as part of this report. All lands are reported in terms of acres, miles, or number of sites. Facilities may be developed on them, but they are not identified in this reporting system.

It should be noted that this summary report relates to lands in terms of total acres or miles used, but not in terms of intensity of use.

By special request of the Governor's Office, estimated valuations of state-owned or managed lands were also developed.

PRIMARY USE

All lands are identified by use and recorded in acres, sites and miles by the agency responsible for management. The thirty-seven uses recorded in acres are:

Administrative Site*	Hatchery*
Agricultural	Historical*
Aquatic	Hospital*
Beautification Areas	Industrial
Boating*	Institution*
Borrow Pit*	Maintenance Site*
Camp*	No Specified Use
Campus*	Non-Commercial Forest
Commercial	Non-Commercial Forest-Grazing
Commercial Forest	Non-Renewable Resource
Commercial Forest-Grazing	Other
Commercial Recreation	Oyster Lands
Ferry Terminals	Recreation*
Fish Protective Facilities*	Research*
Game Farm*	Residential
Game Range	Rest Stop*
Game Range and Forest	Rights-of-Way
Game Range and Non-Commercial Forest	School*
Grazing	

* and/or recorded by number of sites.

The five highway uses recorded in miles are:

1. Collector Highway
2. Interstate Highway
3. Major Highway
4. Principal Highway
5. Other Public Roads

The five water-related uses recorded in miles are:

1. First Class Shorelands
2. Second Class Shorelands
3. First Class Tidelands
4. Second Class Tidelands
5. Streambank Easements

LAND USE SUMMARY

The ten major land uses in terms of total acres owned and leased are:

Uses	Acres	Uses	Acres
1. Commercial Forest	1,030,617	6. Game Range	363,336
2. Grazing	555,595	7. Agriculture	144,295
3. Game Range and Forest	444,925	8. Aquatic	127,528
4. Commercial Forest-Grazing	394,008	9. Recreation	97,616
5. Non-Commercial Forest	380,599	10. Other	69,772

The highway uses recorded in miles are:

Uses	Miles
1. Major Highway	2,268
2. Collector Highways	2,217
3. Principal Highway	1,262
4. Other Public Roads	706
5. Interstate Highway	617

The water-related uses recorded in miles are:

Uses	Miles
1. Second Class Shorelands	4,431
2. Second Class Tidelands	1,367
3. First Class Shorelands	111
4. First Class Tidelands	80
5. Streambank Easements	11

PRIMARY USE SUMMARY

Second Class Tidelands	36	212,580 to 555,050	1,367	354,696,020
First Class Shorelands	1	610 to 16,860	111	843,759
Second Class Shorelands	1	465 to 11,510	3,999	21,056,687
		Subtotal	5,557	414,087,696
Total estimated value all state owned lands (No capital improvements included)				\$2,664,779,148

* Estimates are based on State Highway Department acquisition records for 1967. A single estimated value was established for every use in each of the thirteen planning regions of the state. The two values shown represent the highest and lowest values established. A cost appreciation factor has been included, therefore, the values reflect estimates for 1970.

Total acreage by use for each district was multiplied by the estimated value per acre for that district. Then values for all districts were added to provide the statewide estimated value for each use. These estimates do not include any values which may accrue to the land from capital improvements.

+ Uses measured in miles were converted to acres by applying an average width per mile to each use. Estimated values per mile are for the total acres within a measured mile for each use.

+ Indicates lands leased from agencies or organizations outside of state government. Other agreements besides lease contracts may have been enacted.

* No more than five uses are recorded here for any one agency. Order of priority is by total acres reported for each use.

SECONDARY USES^{1/}

Secondary uses occur on lands previously reported and, therefore, do not add to the total acreages shown earlier in this report. Secondary uses are always in addition to a primary use. There were no restrictions placed on secondary use terminology; therefore, classifications may differ from the thirty-seven primary uses. The secondary uses by total acreage provided are shown here. The primary use shown is the dominant one in terms of acreage available for the secondary use.

SECONDARY USE	ACREAGE (Total All Agencies)	PRIMARY USE
Dispersed Recreation ^{2/}	2,881,244 ^{3/}	Commercial Forest ^{4/}
Grazing	233,865	Game Range and Forest
Buffer Zone	11,020	Other
Education	10,093	Commercial Forest
Research	6,835	Game Range
Agriculture	3,398	Game Range
Christmas Trees	3,092	Other
Game Lands	662	Commercial Forest
Camps - Recreation	412	Other
Watersheds	326	Commercial Forest
Arboretums	285	Campus
Hospital	2	Campus
Total Acres Reported	3,151,234	

^{1/} Three agencies--The Department of Game, the Department of Natural Resources, and the University of Washington, reported secondary uses on lands they administered.

^{2/} Dispersed Recreation means lands are open to such activities as hiking, hunting, fishing, photography and others. However, no facilities are provided nor is access available exclusively for recreation.

^{3/} 985 miles of tidelands and 3,798 miles of shorelands are also included.

^{4/} Other primary uses providing over 100,000 acres each for dispersed recreation are: game range, game range and forest, grazing, non-commercial forest, and commercial forest-grazing.

STATE LANDS INVENTORY COMMITTEE

State Planning Division, OPPFM.....Gerald Pelton, Chairman
Information Systems Division, OPPFM.....John Boyd
Department of Game.....James Brigham
Department of Institutions.....Sidney Coleman
Department of Natural Resources.....Roger Harding
Legislative Budget Committee.....Don Peterson
Parks and Recreation Commission.....Don Kirkland
Planning and Community Affairs Agency.....Michael McCormick
University of Washington.....John Paul

The cooperation of all boards, commissions, departments and other agencies of state government in preparing this state lands inventory is greatly appreciated.

This report was prepared by the OFFICE OF PROGRAM PLANNING AND FISCAL MANAGEMENT.

The preparation of this publication was financed in part through a comprehensive planning grant from the Department of Housing and Urban Development.
