Yakima Greenway Foundation Renewing the Yakima Greenway Master Plan

Grant Awarded: \$75,322

The Yakima Greenway Foundation will use this grant to update its master plan for the preservation and enhancement of trails, paths, and parks along the Naches and Yakima Rivers, ensuring the greenway remains a destination for recreation, nature, and community. The final plan will include an analysis of current conditions, equity, and high-need areas; mapping of access points, trail conditions, bicycle and pedestrian connections, and community destinations; trail planning; public engagement; and a prioritized list of projects. The Yakima Greenway is a critical piece of improving community wellness. Yakima County is among the least healthy counties in Washington with 26 percent of adults in poor or fair health, including elevated rates of obesity, high blood pressure, diabetes, mental distress, and deaths from suicide, overdoses, and alcoholism compared to other counties. Parks and pathways are a critical part of healthy communities. The greenway is busier than ever with two thousand weekly visits to its trails and parks. With heavy usage, there is also a visible need to improve facilities, steward natural areas, and improve opportunities for community collaboration. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2442)

Mattawa Developing a Parks, Recreation, and Open Space Plan

Grant Awarded: \$60,000

The City of Mattawa will use this grant to develop a parks, recreation, and open space plan. This will be the first dedicated planning for recreation access since the city incorporated in 1958. The goal of this plan is to ensure that residents have adequate access to outdoor recreation. The plan will have five primary components: a vision for recreation access, an inventory of facilities and their conditions, a community outreach plan including an assessment of need, a level of service standard, and prioritized lists of parks, recreation, and open space improvements for the next twenty years. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2518)

Capitol Land Trust Planning for Recreational Use at Bayshore Preserve

Grant Awarded: \$150,000

The Capitol Land Trust will use this grant to plan development of the Bayshore Preserve in Mason County to accommodate recreational use. The preserve is a seventy-four-acre former golf course that was restored to a wildlife habitat area. The property has hosted outdoor field learning with the Shelton School District, Oakland Bay Days, and an annual salmon viewing program. However, the land trust has not been able to afford the costs of building the infrastructure needed to support the level of interest and use of the property. Needs include a parking lot designed to allow safe access for school buses, accessible trails and interpretive material, a covered structure, and viewing platforms. The land trust's development plan will

Planning for Recreation Access Grant Descriptions (In Rank Order)

include outreach, planning, design, and permitting to bring these important recreational improvements closer to construction. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2429)

Oroville Planning Recreation Opportunities

Grant Awarded: \$40,000

The City of Oroville will use this grant to develop a parks, recreation, and open space plan. The project will include an inventory and assessment of park assets, outreach to understand local demand and needs, and the development of a capital improvement plan. The City will partner with the nonprofit Oroville Initiative to lead the public engagement process, which will focus on in-person, community-building events. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2513)

Seattle Parks Foundation Planning Renovation of the Concord International School's Puma Playfield

Grant Awarded: \$250,000

The Seattle Parks Foundation will use this grant to develop construction documents and get permits for a project that will transform the Concord International Elementary School playground and field into a community recreation area. The school is in the South Park neighborhood, which lacks greenspace. Residents there have access to just 40 square feet per person compared to the average 387 square feet across Seattle. The school's playground mostly is paved and the playfield has drainage issues making it unusable for much of the year. The Greening Concord Steering Committee, made up of staff, school administrators, and community members, has worked with the Seattle Parks Foundation and other groups to reimagine the playfield as an asset that could be used by both the school and the community. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2454)

Swinomish Tribe Preparing Construction Documents for a Redesigned Playground

Grant Awarded: \$45,000

The Swinomish Indian Tribal Community will use this grant to turn a completed playground design into construction-ready plans for bidding. The Tribe has redesigned the playground at its early learning center, which is within easy walking distance of the Swinomish village center. The playground equipment is worn out, not appropriate for young kids, and creates a high risk for injury. When not used by kids, the space often hosts community events. The Tribe has completed the first stages of the project, including soliciting community input, designing the site, and demolishing the old equipment. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2520)

Planning for Recreation Access

Grant Descriptions (In Rank Order)

Wapato **Writing a Parks, Recreation, and Open Space Plan**

Grant Awarded: \$92,850

The City of Wapato will use this grant to develop a comprehensive parks, recreation, and open space plan that will be used for planning projects and applying for construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2453)

George **Developing a Comprehensive Parks and Recreation Plan**

Grant Awarded: \$59,000

The City of George will use this grant to develop a parks and recreation plan that will be used for planning projects and applying for construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2435)

Chelan **Developing a Comprehensive Parks and Recreation Master Plan**

Grant Awarded: \$86,000

The City of Chelan will use this grant to develop a comprehensive plan that will guide the creation of its park system for years to come. The plan is meant to create a balanced park system that includes regional destination parks, high-quality local parks, biking and walking links between parks and other community centers, regional trail connections, conservation lands, recreation programming, and increased access to lakes at the ends of public roads that submerged with the construction of the Chelan Dam. The intention is that this plan would form a decision-making framework that additional planning efforts would supplement and update. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2523)

Wishram School District **Designing a Ball Field**

Grant Awarded: \$50,000

The Wishram School District will use this grant to design an athletic field in the community's only park. The park's amenities include a dirt lot, a half basketball court, and small play area. This small, impoverished community has no football, softball, baseball, or soccer fields. The school district will work with the community and a consultant to solicit community input on layout and design and develop site plans for the park and field. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2500)

Spokane Tribe of Indians **Planning the Renovation of Snwx mene (Salmon People) Island**

Grant Awarded: \$55,000

The Spokane Tribe, in partnership with the City of Spokane, will use this grant to design the renovation of Snwx mene (Salmon People) Island, formally known as Canada Island, in Riverfront Park. The goals of the renovation are to provide a space for the community to learn about the

Planning for Recreation Access

Grant Descriptions (In Rank Order)

traditions and culture of the Tribe, to reestablish the Tribe's presence in Riverfront Park and downtown Spokane, and to complete a project by 2024, which is the fiftieth anniversary of Expo 74. The Tribe's vision of the project is to reintroduce its members to the island and Spokane Falls area and to provide the community with historical tribal knowledge through educational and cultural activities. The redesigned island will include demonstration spaces, accessibility improvements, and landscape renovations to return the land to its native condition. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2508)

Elmer City **Grant Awarded: \$68,350**

Developing a Comprehensive Parks and Recreation Plan

The Town of Elmer City will use this grant to develop a comprehensive parks and recreation plan that will be used for planning projects and applying for construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2437)

Carbonado **Grant Awarded: \$39,075**

Creating a New Parks, Recreation, and Open Space Plan

The Town of Carbonado will use this grant to create a new parks, recreation, and open space plan. The plan will include an assessment of park facilities and gaps in levels of service, identification of locations for new recreation and open space opportunities, and a list of projects. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2473)

Rock Island **Grant Awarded: \$52,000**

Planning for the Extension of the Regional Apple Capital Loop Trail

The City of Rock Island will use this grant to create a planning document that is the first step in identifying potential routes to extend the regional Apple Capital Loop Trail seven miles from Hydro Park to the city. Currently, people must walk on State Route 28 to reach the trail. The trail extension would connect residents of all ages and mobility to the waterfront, playgrounds, ball fields, and picnic areas. This project will result in development of a final planning document that would be used when applying for grants to identify a preferred route and ultimately construct the trail extension. This project will be part of a regional planning effort to connect trails in Douglas County and adjoining cities. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2477)

Burien **Grant Awarded: \$150,000**

Developing a Conceptual Design for Hilltop Park

The City of Burien will use this grant to develop a schematic design for Hilltop Park, an undeveloped, roughly five-acre park in the northeast Boulevard Park neighborhood. The park serves a community where residents are 66 percent people of color, 21 percent below the

Planning for Recreation Access

Grant Descriptions (In Rank Order)

poverty line, and in a flight path of SeaTac Airport. The community has been and will continue to be an integral partner in restoring the park and determining park improvements. The City will base the design on previously collected community priorities for the park and, after learning the outcome of environmental studies, a topographic survey and a geotechnical investigation. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2457)

Morton

Grant Awarded: \$75,550

Developing a Comprehensive Parks and Recreation

The City of Morton will use this grant to develop a comprehensive parks and recreation plan that will be used for planning projects and applying for construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2443)

Chewelah

Grant Awarded: \$95,000

Developing the City' First Parks, Recreation, and Open Space Master Plan

The City of Chewelah will use this grant to engage its community in development of the city's first parks, recreation, and open space master plan. Chewelah has never conducted a park planning process before. This project includes a feasibility study to assess the potential for creation of a regional park and recreation district centered in Chewelah. Expanding the recreational service area would provide more funding for construction and operations. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2433)

Friends of the Columbia Gorge

Grant Awarded: \$250,000

Increasing Outdoor Accessibility in the Columbia River Gorge

The Friends of the Columbia Gorge will use this grant to create final designs for the Cape Horn Preserve in Skamania County. When developed, the preserve will include hiking trails, picnicking and gathering spaces, educational features, and viewpoints of the Columbia River Gorge. The friends steering committee has been working for more than year to improve accessibility and inclusion for people with a range of experiences, abilities, and native languages, and to improve protection and restoration of natural habitats in the preserve. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2448)

Mount St. Helens Institute

Grant Awarded: \$250,000

Planning Campground and Trail Expansions at Mount Saint Helens

The Mount St. Helens Institute will use this grant to design, engineer, and permit construction of a forty-site public campground expected to serve more than five thousand visitors annually and improvements to hiking and mountain biking trails that provide access for fishing, boating, and picnicking at nearby Coldwater Lake. The work will expand recreational access to the Mount St. Helen's Monument, a unique landscape surrounding a volcano. The campground and trails are

Planning for Recreation Access

Grant Descriptions (In Rank Order)

scheduled to be built by the end of 2024. The campground and improved trail system are the first step in a larger vision to expand recreational access in the rural Toutle Valley of Cowlitz County. The institute and its partners plan to transform the former Coldwater Ridge Visitor Center into a lodge and educational center. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2449)

Waterville

Grant Awarded: \$35,000

Developing a Park and Recreation Plan Focusing on Badger Mountain

The Town of Waterville will use this grant to complete a comprehensive parks and recreation plan with a focus on planning facilities for a multi-use, non-motorized trail on Badger Mountain, three miles south of town. The trail is in the only forested area in Douglas County. Biking, hiking, and snow recreation are top activities for the community, but there are few local resources for engaging in these activities. The Town will map the trail and develop design construction drawings, complete engineering, and acquire permits for an entrance and parking lot. Work will include outreach to recreation and bike groups, local tribes, government agencies, and education, conservation, and outdoor agencies. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2505)

Quincy

Grant Awarded: \$249,590

Designing Field in Lauzier Park

The City of Quincy will use the grant to design thirty acres of sports fields next to Lauzier Park, the largest and most active park in the southwest section of the city. The new sports fields will replace softball and baseball fields in other parks for one designated and well-developed four-plex with restrooms, lights, and support facilities. The new park design also will include turning a large grass area into lighted soccer fields of different sizes. Soccer is played in Quincy nearly all year between youth and adult teams and leagues and more fields of different sizes will provide more access for these activities. The new park will have multiple parking lots, one of which will be next to the established park to help alleviate congestion. Putting similar fields together will open space in other parks for upgrades. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2509)

Warden

Grant Awarded: \$89,650

Writing a Comprehensive Parks and Recreation Plan

The City of Warden will use this grant to develop a comprehensive parks and recreation plan for use in planning for capital projects and applications for funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2441)

Kubota Garden Foundation

Grant Awarded: \$225,000

Preparing for a Gathering Plaza and Parking Lot at Kubota Garden

The Kubota Garden Foundation will use this grant to help finish engineering, design, and permitting for a gathering plaza and expanded parking lot at Kubota Garden in Seattle. Kubota Garden is a free, Japanese garden in Rainier Beach, a diverse neighborhood in southeast Seattle where 75 percent of the residents are people of color, 42 percent speak languages other than English at home, 31 percent are immigrants, and 25 percent live in poverty. Garden attendance has more than doubled to 126,352 since 2014 with 95 percent of visitors arriving by car. The garden entry is difficult to identify, the space is inadequate for programming, the Japanese garden elements are overshadowed, and the thirty-five-car parking is insufficient. The improvements, which will include an Ishigaki wall (Japanese dry-laid stone retaining wall), will provide critical access to trails and cultural features in the twenty-acre garden. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2464)

Stevenson

Grant Awarded: \$100,000

Developing a Stevenson Community Active Parks Plan

The City of Stevenson will use this grant to hire a consultant to create a citywide, long-range, comprehensive recreation plan, which will consist of a community engagement process, determination of feasibility, and initial construction cost estimates. The plan would cover land owned or managed by the City of Stevenson, Stevenson-Carson School District, Port of Skamania, Skamania County, and the Stevenson Community Pool District. Despite being in the Columbia River Gorge National Scenic Area, forty miles east of Vancouver, the community has few recreation opportunities in the city limits. The community began creating a downtown park plaza with amenities for people to gather and recreate in 2015 and wants to move that project forward. It needs a comprehensive park plan to apply for grants. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2504)

Lummi Island Community Association

Grant Awarded: \$103,450

Planning a Public Dock on Lummi Island

The Lummi Island Community Association will use this grant to conduct public involvement and develop preliminary site plans, conceptual designs, and initial cost estimates for construction of a public pier and dock on Lummi Island. Currently, there is no public recreational dock on the island. The pier, gangway, and floating dock would be built at Whatcom County's Lummi Island Beach Access site. The improvements would give users safer access to the water for fishing, crabbing, boating, and nature viewing. This project is a high priority for the community because it will provide public waterfront access, especially for those challenged by limited mobility. The dock also will provide an option for people traveling by boat to the mainland during ferry outages. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2489)

Planning for Recreation Access Grant Descriptions (In Rank Order)

Orondo School District Planning a Playground and Learning Center

Grant Awarded: \$20,000

The Orondo School District will use this grant to pay for plans and permits for the construction of a playground and learning center for students in preschool through high school. The playground equipment and center would capitalize on the growth and development of gross motor skills and physical fitness, and provide sensory activities and access for all students, especially those with disabilities. Having recreational activities and team-building activities and structures in the district's after-school program and throughout its school campus would allow students to build skills and resiliency. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2434)

Seattle Parks Foundation Getting Ideas for a Henderson Street Project in Rainier Beach

Grant Awarded: \$248,000

The Seattle Parks Foundation will partner with the Rainier Beach Link2Lake Committee and use this grant to plan for recreational opportunities along the Henderson Street Corridor. The grant will pay for a community engagement process to include robust involvement of youth, a feasibility study, cultural resource study, and site design. As housing opportunities are expanded in the Rainier Beach neighborhood, it becomes increasingly important to improve recreational spaces and to install new opportunities to connect people to nature. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2507)

RAVE Foundation Planning for MLK Jr Elementary Mini Pitch

Grant Awarded: \$70,000

The RAVE Foundation will use this grant to prepare for building a soccer mini pitch at Martin Luther King Jr. Elementary School in Seattle. Mini pitch is a fast-paced, scaled-down soccer game played on a hard surface with dimensions similar to a basketball court. The RAVE Foundation, the official charitable partner of the Seattle Sounders FC, will hire contractors to conduct a land survey, drainage assessment, and apply for permits. The grant also will fund the artwork design for the pitch. Once constructed, the mini pitch would be used by students for free play and for free programs provided by RAVE, such as soccer skills training sessions for children ages five to twelve and physical literacy programs for preschoolers. During non-school hours, the facility would be available to the community. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2484)

North Central Washington Sports Rink and Event Center Planning an Ice Rink

Grant Awarded: \$250,000

The North Central Washington Sports Rink and Event Center will use this grant to plan for an outdoor ice rink and supporting facilities that when built would provide opportunities for ice

Planning for Recreation Access

Grant Descriptions (In Rank Order)

skating, hockey, and figure skating in the winter and pickle ball, roller hockey, and roller skating in the summer. The grant will be used to develop site assessments and construction plans, conduct surveys and support community engagement. The rink site is on Pateros School District land along the Columbia River. North central Washington has little or no outdoor opportunities for youth from November to March. The rink will offer affordable rentals, tickets and scholarships, free skating for fourth graders, field trips, discount pricing for groups, and season passes. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2450)

Chelan County

Grant Awarded: \$35,000

Planning a Peshastin Community Park

Chelan County, in partnership with the Peshastin Community Council, will use this grant to engage the community, evaluate outdoor recreation alternatives, and develop a preferred alternative for development of the Peshastin Mill site. The sixty-five-acre site is the former home of the Peshastin Mill. Peshastin is a rural community in the Wenatchee River valley near Dryden and midway between Leavenworth and Cashmere. A majority of its residents are low to moderate income. The community generally lacks access to parks and outdoor recreation and must drive to enjoy these opportunities. There is high community interest in evaluating alternatives for use of the land for outdoor recreation, and the landowner is supportive of these efforts. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2499)

Jefferson County Fairgrounds Association

Grant Awarded: \$60,700

Designing the GoGo Pump Track

The Jefferson County Fairgrounds Association, in partnership with the organization GoGoJeffCo, will use this grant to complete construction design and plans for a pump track on the thirty-two-acre fairgrounds in the North Beach neighborhood of Port Townsend. The track will have a series of asphalt trails, bumps, and banks that can be used by people riding bikes, scooters, skateboards, and other nonmotorized wheeled options year-round for exercise and recreation. The plans will include grading, bank buildups, stormwater and landscape architecture design, surveying, and mapping. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2466)

Tukwila

Grant Awarded: \$197,300

Developing a Playbook for Inclusive Park Design

The Tukwila Parks and Recreation Department will use this grant to engage the community in developing a playbook for inclusive park design that reflects the diverse ethnic, racial, religious, and cultural dimensions of city residents. The toolkit will provide guiding principles and actionable tactics for planning, designing, and developing parks, trails, and open spaces so they are more welcoming and foster belonging. The playbook will provide tangible examples of

Planning for Recreation Access

Grant Descriptions (In Rank Order)

landscape designs, treatments, furnishings, and functionality that are most desired by residents. Once developed, the playbook will guide design of improvements and new investments across the park system. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2506)

Longview

Grant Awarded: \$250,000

Planning for an Inclusive Playground in Cloney Park

The Longview Parks and Recreation Department will use this grant to complete a plan for the redevelopment of Cloney Park. This project will result in architectural designs, construction blueprints, engineering, and permits for a future fully inclusive playground and park improvements including restrooms, parking lot enhancements, and lighting. Cloney Park is in an underserved area with a high percentage of low- to moderate-income households, and the aging playground and skatepark are past their estimated lifespan. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2456)

Elma

Grant Awarded: \$70,000

Developing a Long-Range Recreation Plan

The City of Elma will use this grant to hire a consultant to develop a long-range, comprehensive plan for parks, recreation facilities, and other open spaces. In addition, the City will hire a civil engineer and landscape architect to plan for a public pickleball/basketball court at the Summit Pacific Medical Center. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2463)

Goldendale

Grant Awarded: \$85,000

Planning Upgrades to Ekone Park

The City of Goldendale will use this grant to hire a landscape architect and a cultural resources consultant in preparation for upgrading Ekone Park. The cultural resources consultant will conduct a cultural resources survey of the site to ensure that no historical items are impacted. Then the landscape architect will draft different options for park upgrades to present to the public for their input. Once a consensus has been reached, the plans will be finalized and used to seek construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2495)

Prosser

Grant Awarded: \$162,708

Developing a Parks Plan

The City of Prosser will use this grant to develop a long-range parks, recreation, and open space plan. Historically, Prosser has relied on a single data collection method—a survey posted on the city's website—for updating its plan. This method is not robust enough to fully explore Prosser's

Planning for Recreation Access Grant Descriptions (In Rank Order)

diverse recreation needs, nor does it enable city leaders to identify and eliminate access barriers for underserved populations. To solve this problem, Prosser will create a plan using multiple data collection methods, including multilingual online surveys, canvassing, focus groups, and public meetings, to ensure optimum public input. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2486)

Alliance for Pioneer Square **Grant Awarded: \$245,000** **Engaging the Pioneer Park Community to Improve the Park**

The Alliance for Pioneer Square will use this grant to pay for engineering, design, and public engagement for projects to improve Pioneer Park. The work includes engaging the historically underserved community throughout Pioneer Square, hiring a community facilitator and landscape architect to work with the community, and developing a design for the park that serves the recreational and social needs of the community. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2527)

Covington **Grant Awarded: \$245,000** **Planning and Designing Jenkins Creek Trail**

The City of Covington will use this grant to plan and design the three-mile Jenkins Creek Trail that will run through the heart of the city alongside Jenkins Creek with connections to the King County trail network at either end. This multiuse recreational trail will connect neighborhoods, schools, healthcare facilities, parks, and commercial areas. This trail will be an important outdoor recreation space for residents, including those in nearby high-density and low-income housing. This project will include a trail feasibility study; acquisition planning; development of trail design standards; development of plans, specifications, and estimates for constructing the first phase of the trail; and outreach and public engagement. Building a trail through the heart of Covington is an opportunity that could be lost to development in the near future if not properly planned now. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2482)

Tenino School District **Grant Awarded: \$69,969** **Planning Regional Practice Facilities**

The Tenino School District will use this grant to complete preliminary site planning, the land-use approval process, and final construction and bid documents for athletic fields. The district plans to add athletic and recreational fields that include youth football and soccer for use by school and community teams. In addition, the district is planning walking, and potentially biking, trails that would connect the high school and middle school campuses and allow access around the proposed athletic fields. The work will allow the district to have a "shovel ready" project to bid in the spring of 2024. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2519)

Planning for Recreation Access

Grant Descriptions (In Rank Order)

Zillah **Designing a Splash Park**

Grant Awarded: \$109,700

The City of Zillah will use this grant to design and plan for a community splash park. The project will consist of a cultural resources review, development of engineering documents, and permitting. Once constructed, the splash park will be a place for active outdoor recreation and a gathering space for the community and visitors. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2428)

Seattle **Planning Upgrades to a Garfield Super Block Park**

Grant Awarded: \$248,129

The City of Seattle will use this grant to plan an upgrade to a park in an area known as the Garfield Super Block. The park includes the Garfield Community Center, Medgar Evers Pool, a restroom, play fields, tennis courts, and play areas. The city, in partnership with the Garfield Super Block Coalition, seeks to fulfill a seventeen-year-old promise to the surrounding historically black community to upgrade the park against a backdrop of aggressive gentrification that is erasing the rich cultural diversity in Seattle's Central District. The grant will be used for geotechnical surveys, a cultural resource survey, community outreach, and permitting for new public art and site furnishings, an improved entrance and walking paths, inclusive play equipment including the first parkour installation in Seattle, safety upgrades, and new restrooms. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2469)

Reardan-Edwall School District **Developing a Comprehensive Plan for Parkland**

Grant Awarded: \$98,500

The Reardan-Edwall School District will use this grant to develop a comprehensive plan for eighty-three acres it owns outside of the town of Reardan. Currently, the land has one baseball field and one softball field. The desire is to have the planning align with the comprehensive parks plan that the Town is writing. The school district and town have been partnering on several projects over the past couple of years, including town halls and a recreational needs assessment. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2512)

Cascade Columbia Fisheries Enhancement Group **Designing a Salmon Lifecycle Landscape**

Grant Awarded: \$107,007

The Cascade Columbia Fisheries Enhancement Group will use this grant to plan an interpretive trail that will take visitors through a lifelike landscape that salmon travel through from headwater streams to the Pacific Ocean. Funds will be used to hire a landscape architect to convene stakeholders, finalize the trail design, and develop construction cost estimates. Once built, visitors walking the trail will be able to interact with the challenges salmon face during

Grant Descriptions (In Rank Order)

their journey while observing local wildlife and geology and regional Indigenous culture. The trail will be built at the U.S. Fish and Wildlife Service's National Fish Hatchery in Leavenworth. Outdoor recreation in the region is not widely accessible because the rugged nature of the landscape can discourage or exclude people who lack the experience, confidence, or resources needed to participate. This project will provide a gateway to outdoor exploration beyond traditional parks. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2528)

Chelan-Douglas Land Trust

Grant Awarded: \$60,000

Designing Access to the Wenatchee Foothills

The Chelan-Douglas Land Trust will use this grant to develop a public access plan including conceptual designs for three trailheads in the Wenatchee Foothills. The land trust will conduct community outreach, hire contractors to advise on location selection, develop schematic designs and construction documents, and ensure access to the sites is broadly inclusive. The plan is expected to provide opportunities for visitors to experience habitat along waterways and provide access north of the urban growth area of Wenatchee. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2439)

Eatonville

Grant Awarded: \$213,000

Developing a Parks, Recreation, and Trails Plan

The Town of Eatonville will use this grant to develop a comprehensive parks, recreation, and trails plan and to do preliminary design work for two conceptual trails in the area. Eatonville has few resources to do this type of planning. Developing more recreation opportunities, especially those that allow people to visit beautiful natural areas such as the Mashel River, would contribute to the local health and economy. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2524)

Manson Parks and Recreation District

Grant Awarded: \$150,000

Planning for Better Access and Better Use at Two Parks

The Manson Parks and Recreation District will use this grant to conduct a planning effort at Singleton Park and Willow Point Park to improve access and use of the parks. This effort will identify the shortfall in facilities and recreational opportunities, define access limitations, complete preliminary permitting and environmental and engineering services, and develop a collaborative action plan to secure funding for improvements. This planning effort will address outdoor recreation opportunities and access gaps at the two parks. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2510)

Grant Descriptions (In Rank Order)

Wenatchee Valley TREAD Developing the First Douglas County Recreation Plan

Grant Awarded: \$145,460

Wenatchee Valley TREAD (Trails Recreation Education Advocacy and Development) will use this grant to create the first county-wide recreation plan. Work will include identifying existing outdoor recreational amenities, gathering community feedback on those amenities, identifying future outdoor recreational opportunities, mapping those new opportunities and connections to existing amenities, and recommending next steps. The plan will enable the County and its partners to apply for future funding for specific projects. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2521)

Seattle Public Schools Designing Elementary School Play Structures

Grant Awarded: \$220,000

Seattle Public Schools will use this grant to hire a landscape architect to plan and design replacements for play structures at twelve elementary schools. The schools are Bailey Gatzert, Broadview Thomson, Coe, Highland Park, Interagency/Columbia, Lafayette, McDonald, Pathfinder, Rising Star, Thurgood Marshall, and Tops. A joint-use agreement between Seattle Public School and Seattle Parks and Recreation Department ensures that school sites are open to public use outside of regular school hours. In many neighborhoods, schools serve as the area of play for students and community on weekends and evenings. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2470)

Black Diamond Designing the Ginder Creek Open Space Park

Grant Awarded: \$164,540

The City of Black Diamond will use this grant to design the Ginder Creek Open Space as an open space park with trails. The goal is create a park that preserves the city's natural resources and provides access for the public to enjoy those places. The City will plan, design, and permit a trail system, playground, and amenities such as parking, restrooms, benches, and signs. The City also will update the 2017 Critical Areas Report for the site to verify wetland and stream boundaries, enhance sensitive area buffers, and provide for fencing and protection. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2475)

Lamont School District Designing Lamont Community Park

Grant Awarded: \$122,500

The Lamont School District will use this grant to design a community park in this small, rural eastern Washington community. The district will do community engagement and hire consultants to conduct a cultural resources review and develop schematic design drawings and construction documents. Residents have few options for recreational activities there. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2483)

Planning for Recreation Access

Grant Descriptions (In Rank Order)

Seattle Public Schools **Designing Upgrades to Seattle School Playfields**

Grant Awarded: \$200,000

Seattle Public Schools will use this grant to pay for landscape architect services to design, estimate costs, and permit the conversion of grass play areas into synthetic turf, which will make the play areas usable year-round. The natural grass play areas are very small, heavily used, and unable to meet current needs. Designs will be done at four elementary schools: Dunlap, Graham Hill, Greenwood, and Leschi, each of which are open to the community after school, on weekends, and in the summer. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2460)

Kittitas **Developing a Parks, Recreation, and Open Space Plan**

Grant Awarded: \$88,150

The City of Kittitas will use this grant to develop a comprehensive parks, recreation, and open space plan for use in planning projects and applying for construction funding. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2485)

Othello **Designing a Spray Park at Kiwanis Park**

Grant Awarded: \$195,000

The City of Othello will use this grant to conduct outreach and design construction-ready plans for a spray park in Kiwanis Park, one of only two active parks in the community. The spray park will be designed primarily for children twelve and younger and will be a welcome cooling oasis during Othello's hot summers. This project furthers residents' strong interest in free, safe, healthy, youth-centric activities for this underserved community, where youth under eighteen are 39 percent of the population and the poverty rate is 27 percent. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2496)

Tenino **Planning Upgrades to Tenino City Park**

Grant Awarded: \$118,511

The City of Tenino will use this grant to design upgrades to the south end of Tenino City Park, which hosts the Quarry House Community Center, the Tenino Memorial (quarry) Pool, the Tenino Depot Museum Complex, the end of the Yelm-Tenino Trail, and the start of the parks' new Accessibility Trail. The City will complete surveying, landscape architecture and engineering plans for the grounds surrounding the quarry house and museum complex. The plans will include parking access to the south end of the park, a festival area plan, walking trail integration throughout, and electrical and water plans for access and safety. Visit RCO's online Project Snapshot for [more information about this project](#). (22-2479)
